AN
ARCHÆOLOGICAL INDEX

TO REMAINS OF ANTIQUITY OF THE
CELTIC, ROMANO-BRITISH, AND
ANGLO-SAXON PERIODS.

BY

JOHN YONGE AKERMAN, F.S.A.,

CORRESPONDING MEMBER OF THE SOCIETY OF ANTIQUARIES OF SCOTLAND AND OF
NEWCASTLE-UPON-TYNE;

HONORARY MEMBER OF THE ROYAL SOCIETY OF ANTIQUARIES OF FRANCE;

FELLOW OF THE ROYAL SOCIETY OF ANTIQUARIES OF COPENHAGEN; AND CORRESPONDING
MEMBER OF THE ARCHÆOLOGICAL INSTITUTE OF ROME.

LONDON: #

2¹ JOHN RUSSELL SMITH, 4, OLD COMPTON STREET,
SOHO SQUARE.

M. DCCC. XLVII.

1847

TO
THE REVEREND JOSEPH BANCROFT READE,
M.A., F.R.S.,
VICAR OF STONE, NEAR AYLESBURY,

THIS VOLUME IS INSCRIBED,

BY

HIS AFFECTIONATE FRIEND,

JOHN YONGE AKERMAN.

LEWISHAM, JUNE 30, 1847.

PREFACE.

It must afford some gratification to those who have laboured to contribute to our stores of Archæological information, to witness in this country a growing taste for the study of Antiquities.

The ridicule which once attended the prosecution of this study is hushed; and the mute but eloquent relics of Antiquity, are now regarded with interest by all who aspire to be informed of the manners and customs of those who have preceded us.

With such evidence of an improved taste and zeal for the cultivation of Archæological science, it would be needless to plead for its usefulness. To the reflecting mind the fact

that Providence has veiled from us the future, and given us the past for retrospect and experience, is alone sufficient to justify the occupation of a portion of our leisure in the examination and elucidation of the remains of Antiquity, but more especially of those which pertain to our own country.

The materials forming the bulk of this volume are chiefly derived from the examination of sepulchral remains: but, though necessarily limited, these remains are, in many respects, of the highest value and importance to the Archæologist: they comprise the weapons, utensils, and personal ornaments, of different races who once occupied Britain, from the earliest dawn of our history down to the middle of the eighth century, when the Pagan mode of sepulture was finally abandoned in Britain.

The antiquities of three important stages of our history are here brought together, and an attempt is made to classify them, a task difficult only where the objects appear to belong to

Transition-periods, as in the late Roman and early or Pagan-Saxon, and some few relics of a probably Romano-Celtic origin. How much such a work has been needed will be seen by reference to many volumes of very imposing size, and great pretensions, where Celtic, Roman and Anglo-Saxon objects are confounded with each other, in a manner calculated in every way to embarrass and perplex the Archæological Student.

CONTENTS.

PART I.—CELTIC PERIOD.

	Pages.
SECTION I. TUMULI OR BARROWS AND CAIRNS.—Tumuli in Derbyshire; Wiltshire; Dorsetshire.—Different Forms of Celtic Tumuli.—Modes of Interment.—Decomposition of Human Remains.—Sepulchres of the Germans as described by Tacitus.—Ages of Celtic Tumuli.—Tumuli in East Kent.—Tumulus in Iffins Wood near Canterbury.—Disposition of the Urns. . . .	1—15
SECTION II. MENHIRS OR PEULVANS.—Their Destruction with the Spread of Christianity.—Mænhirs near Boroughbridge in Yorkshire. . . .	16—18
SECTION III. DOLMENS, TRILITHS, AND LICHVAENS.—Different Names given to Cromlechs partially destroyed.—Immense Cromlech at New Grange, near Drogheda.—Cromlechs explored by Mr. Lukis in the Channel Islands.—Remarkable Interment in the "Cromlech du Tus."—Cromlechs near Abury in Wiltshire; "Wayland Smith's Cave" in Berks; "Kits Cotty House" in Kent.—Cromlechs in Cornwall; in the Island of Anglesea; in Brittany; near Saumur; near Tours; in Portugal and Spain; in Caernarvonshire.	19—29
SECTION IV. SEPULCHRAL CAVES in Wales and the Channel Islands.	30—32
SECTION V. ROCKING STONES.—Mentioned by Pliny and Apollonius Rhodius.—Singular Example of one at West Hoadley in Sussex; in Cornwall;

CELTIC PERIOD.

ARCHÆOLOGICAL INDEX.

§ 1.

TUMULI, OR BARROWS AND CAIRNS.

THE raising of mounds of earth or stone over the remains of the dead, is a practice which may be traced in all countries to the remotest times. A heap of stones marked the grave of Absalom.¹ The grave of Patroclus was thus distinguished.² Herodotus informs us, that the tumulus erected over the remains of Alyattes, the father of Cræsus, was more than six stadia in circumference;³ and Diodorus Siculus says, that that of Ninus was of such dimensions, that at a distance it might be mistaken for the citadel of Nineveh.⁴ Virgil's allusion to the tomb of Dercennus is well known:—

Fuit ingens monte sub alto
Regis Dercenni terreno ex aggere bustum.⁵

And a huge tumulus, erected by Germanicus in the forests of Germany, covered the remains and told to posterity the destruction of the legions of Varus.⁶

¹ 2 Samuel xviii. 17.

⁴ Lib. ii. p. 95. ed. 1604.

⁵ Æn. lib. xi. 849, 850.

⁶ Tacit. Annales, lib. i. c. 62.

Nor are these early forms of sepulture confined to the countries of the Old World. They are found in Virginia, according to a modern writer,⁷ and attest the universal prevalence of a desire to protect the remains of the dead from desecration. In Great Britain, France, Spain, Portugal, Germany, Sweden and Denmark, many tumuli exist; and though they sometimes differ, both in their mode of construction and their contents, the latter furnish indisputable evidence of their being remains of the Celtic race.

Those tumuli which are formed of heaps of stones are called *Cairns*, and, by the antiquaries of France, *Galgals*. Sometimes they contain galleries communicating with sepulchral niches or chambers. An example of the tumulus of earth and stone on Brassington Moor, near Elton, in the Peak of Derbyshire, is given by Douglas.⁸ Near this tumulus are two stone circles, probably the bases of other Cairns. Another tumulus of the same description, with a cromlech in the centre, stands on Stackhouse Scar, about two miles and a half from Settle, in the district of Craven, in Yorkshire.¹⁰

⁸ *Nenia Britannica*, p. 171. Plate xxxvi., No. 1.

⁹ *Ibid.* p. 165. Plate xxxv., No. 1.

¹⁰ In the "*Memoires de la Société des Antiquaires de Normandie*," vol. viii., will be found an account of the opening of a very large chambered tumulus at Fontenay-le-Marmion, near

A vast number of barrows of the Celtic period have been explored in England, particularly in Wiltshire and Dorsetshire, where they are very numerous on the downs and other high land. Yet, notwithstanding, they bear no proportion even to a very scanty population, and lead to the inference, that however simple the character of the interment, and the relics found in these graves, the heaped up earth did not always cover the remains of the humbler population, but rather denotes the grave of persons above the common rank. The same may be said of the barrows of the Anglo-Saxon period, of which we shall hereafter speak. Even supposing that one tumulus contained the remains of several members of a family, as is the case with many of those of the Celtic period, of which practice we have evidence in some of those of the Anglo-Saxons, we are left to conclude, that the common people must have been often interred without barrows; or, if these mounds were generally raised, they were so slight and insignificant, that they were soon levelled and obliterated.

Barrows of the Celtic period have been divided by English antiquaries into several classes; and their nomenclature, chiefly derived from the local appellation, has been adopted by French writers.

Caen. No articles in metal were discovered. A model of this tumulus may be seen in the museum of the Society at Caen.

Their designations are as follows:—1. Conical Barrows. 2. Bell Barrows. 3. Bowl Barrows. 4. Druid Barrows. 5. Broad Barrows. 6. Twin Barrows. 7. Long Barrows, etc. They are generally surrounded by a trench.¹¹

The names explain the form of the three first mentioned; but it is doubtful whether the cone-shaped barrow is of the earliest class. That of the fourth was absurdly given by Stukeley, from the circumstance of their containing small cups, amber, jet, and glass beads, and (though very rarely) urns. These relics seem to indicate that the barrows of this class are the graves of women. What have been called "Pond Barrows" are formed with great precision, being perfectly circular, with a level area; but excavations have led to no discoveries of sepulchral remains, and it is by no means certain that they are places of interment. Twin Barrows are enclosed within the same circle, and were probably the resting-places of near kinsmen, or attached friends. What have been styled Broad Barrows, are supposed by some to have been designedly thus shaped; but as we have evidence that ancient British tumuli were often opened for the purposes of successive interments,¹²

¹¹ See plate i., Nos. 1—7.

¹² See Mr. Sydenham's paper on the "Dorsetshire Barrows," quoted below; *Archæologia*, vol. xxx. pp. 327—338.

we cannot be certain that their original forms have not undergone some change. The Long Barrows resemble an egg cut lengthwise, and placed on its flat side. Both these and the larger barrows are sometimes *cairns*, and contain Kist-Vaens, and often galleries or passages communicating with sepulchral niches or chambers.

Three very distinct modes of sepulture appear to have been followed by the ancient Britons.

1. Cremation, when the ashes were generally collected and deposited in urns.
2. The interment of the body laid at its length.
3. Its deposit in a cist with the legs in a bent or kneeling attitude. The latter, without any plausible reason, has been thought by some antiquaries to be the most primitive, because the patriarch Jacob is described as gathering up his feet in the bed when dying.¹³ Others, quoting the dying words of Siward, duke of Northumberland, have considered it as denoting that the deceased was a soldier.¹⁴

¹³ Genesis xlix. 33. Herodotus informs us, that the Nasamones buried their dead in this manner, lib. iv. c. 190. It is also practised by the Carib Indians.—Hodgson's "Letters from North America," vol. i. p. 260.

¹⁴ Seating himself in a chair, he ordered his attendants to arm him for the field, observing:—*Sic decet militem defungi, non ut Bos accubans enervari.*—*Ranulph. Higden. Polychron.* lib. vi. p. 281; Hist. Brit. Sax. Ang.-Dan. Script. xv. Gale. folio, Oxon. 1691.

Excavations have shown, that the remains deposited beneath tumuli were sometimes placed on the level ground, and as often were contained in a cist. Examples of both practices were observed by Sir Richard Hoare. Of upwards of twenty-five barrows explored by Mr. Sydenham, in Dorsetshire, the greater part were raised over cists excavated in the chalk. These were covered with a heap of broken flints, apparently laboriously fractured for the purpose; then succeeded large unbroken flints. Above these, were successive layers of brown and black mould, to the thickness of three feet, the exterior coating being a layer of large flints, two and a half feet in thickness. "Among the flints in the inner cairn, were found many fragments of charcoal; and the layers of brown and black mould were divided by a sprinkling of ashes. On the floor of the cist were two skeletons in the bent posture, before noticed. To the west of these, also on the floor of the cist, was a plain interment of burnt bones, of which there was a considerable heap. The bodies were covered with the cairn of chipped flints, without the intervention of flat stones or other protection. Between the chipped and the entire flints, the skeleton of an infant was found, extended at length; on the right of which was a small unornamented urn. Near the crown of the cairn of flints, embedded

in a mass of exceedingly fine black unctuous mould, was a handsome urn, standing upright, about twelve inches high by ten in diameter, nearly full of burnt bones and ashes. It was much ornamented. The tooth-like ornaments are indentations, made, probably, with a pointed piece of bone. The lines in the upper compartments appear to have been impressed, by binding a long strip of twisted skin spirally round the urn. On the south side of the barrow, and about a foot beneath the surface, a large urn was found, eighteen inches in height by thirteen inches in diameter. It had two perforated knobs, that a string might be passed through for suspension, but was otherwise destitute of ornament. It contained a small quantity of burnt bones, amongst which were a few beads, four of which were small, scarcely one eighth of an inch in diameter, apparently of a pearly substance. Another was of bone, small, and cylindrical. There were also two peculiar ornaments, one ring-shaped, about one inch in diameter, the other of the same diameter, star-shaped; and both were perforated. A small cowrie shell¹⁵ was likewise found, which had been perforated, and worn, probably, as a bead. All these articles had been subject to the action of fire. A thick layer of fine black mould was found beneath this urn. Near the last urn,

¹⁵ Cowrie shells are sometimes found in Anglo-Saxon tumuli.

more towards the centre of the barrow, was a smaller urn, seven inches in height and six in diameter. It was nearly full of small burnt bones and ashes, over which flints had been crammed into the mouth of the urn. It was lying somewhat inclined, in a bed of fine black mould. Near the surface of the barrow, a little towards the south, was an interment of burnt bones, covered with a fragment of a very large urn, but of which no more than that piece could be found. The pottery was exceedingly thick, and covered with a careless net-like ornament. A few inches below the summit of the barrow, was a ninth interment, the skeleton of a child, deposited at length, without urn or trace of burning.”¹⁶

Some antiquaries, seeking analogy in the customs of civilised nations, have supposed that cremation was a later mode of interment, and have quoted Pliny to show, that among the Romans it was not an ancient practice;¹⁷ but the barrows of South Dorsetshire negative such a supposition, and prove that both modes prevailed among the ancient Britons at the same period.

¹⁶ Archæologia, vol. xxx. pp. 327—338.

¹⁷ *Ipsum cremare apud Romanos non fuit veteris instituti: terra condebantur* (Hist. Nat. lib. vii. c. 54). The passage from Tacitus, quoted hereafter, would almost lead us to the conclusion, that cremation was *the most honourable* mode of sepulture among the Celtic tribes.

The occasional finding of cists beneath tumuli entirely empty, and without the slightest traces of interment, has given rise to much speculation. Some have supposed that they were the honorary tombs of individuals who had perished in fight, and whose bodies had never been recovered by their relatives; but a closer observation would probably lead to a different conclusion.¹⁸ Anglo-Saxon barrows, many hundred years later, are not unfrequently found empty; but an attentive examination of the floor of the cist, will satisfy the explorer that the remains have been entirely decomposed. This decomposition appears to depend not so much upon the nature of the soil as on the texture of the bones.¹⁹ Sometimes the teeth, and occasionally the teeth with the alveolar process, are all that remain.²⁰

It would be tedious to recapitulate the blunders, and review the absurd reveries indulged in by

¹⁸ Some have thought that these cists were prepared beforehand, just as individuals in the middle ages had their last resting-place prepared during their life-time.

¹⁹ Douglas relates a remarkable and well authenticated case of the entire decomposition of the bones of a very corpulent person within a space of thirty years.—*Nenia Brit.*, p. 58.

²⁰ Pliny mentions tombs made of the stone procured at Assos, in the Troade, which, in forty days, consumed all the body *except the teeth*; hence the word *sarcophagus*, which, in the course of time, was applied to *any* tomb.—*Hist. Nat. lib.* xxxvi. c.17.

antiquaries of the last generation, on the relics discovered in these primitive sepulchres; nor should we be justified in reverting to their theories, if hypothesis did not so often accompany them, disfiguring and obscuring the most interesting and important facts. Many writers have speculated on the various objects which these tumuli are sometimes found to contain, parading, with solemn pedantry, quotations from the classic poets, who, they seem to forget, are describing the funeral rites of a people far advanced in civilisation, and acquainted with luxuries obviously unknown to the simple inhabitants of ancient Britain. That this is not an idle and uncalled-for assertion, will be seen from the beautiful account which Tacitus gives of the mode of interment practised by the ancient Germans—a people, from their geographical position, more likely to have been affected by foreign luxury—since their young princes sometimes perfected themselves in the art of war in other countries—than the rude inhabitants of a remote island. They affect no vain funeral pomp, says he; they use no odours, but a particular kind of wood, in reducing the body to ashes. The warrior's arms are buried with him, and sometimes his horse: a heap of turf covers the grave.²¹ Yet, with

²¹ Funerum nulla ambitio; id solum observatur, ut corpora clarorum virorum certis lignis cremantur. Struem rogi nec

this concise and graphic account of the interments of the ancient Germans, some English antiquaries still talk of "incense cups" and perfumes used at the funerals of the primitive inhabitants of Britain.

It has been remarked by some writers, that barrows are not always found in the vicinity of localities, presumed to have been the site of British towns or villages; but is it always safe to speculate on such faint traces of supposed settlements?

The ages of Celtic tumuli have been surmised by the character of their contents. Thus, barrows containing no vestiges of pottery have been assigned to the earliest period: those in which urns or implements of flint or stone are found, are supposed to denote a second or improved stage in the slow march of civilisation; while the barrows containing metal weapons and personal ornaments, are given to a still later period. This classification appears to be based on rational supposition; yet, as all these remains furnish but imperfect evidence of the rank of the deceased, the chronology of ancient British barrows, as settled by certain writers, is liable to some objec-

vestibus, nec odoribus cumulant; sua cuique arma, quorundam igni et equis adjicitur. Sepulcrum cespes erigit.—Tacit. De Morib. Germ. cap. xxvii.

tions. But the whole subject is fraught with difficulty; and if we compare the account which Tacitus²² gives of the ancient Germans—who were seldom armed with swords and large lances, and among whom a helmet or a breastplate was scarcely ever seen—with Cæsar's description of the inhabitants of ancient Britain, their arms and their war-chariots, our perplexity is increased tenfold.

It is somewhat remarkable that in the Eastern parts of Kent there are but few examples of Celtic tumuli, while those of the Anglo-Saxon period abound. Douglas mentions his opening one of the former, which was surrounded by a group of the latter—a circumstance which seems to show that the Anglo-Saxons did not avoid the ancient places of interment; while we are almost encouraged to conjecture, that in some instances the Saxon barrows led to the obliteration of those of an earlier period. The large quantity of dense black mould so often found to compose a part of the tumulus²³ favours the belief that it is the result of successive interments, and that those interments were not always respected, but that

²² Tacit. *De Morib. Germ.* cap. vi.

²³ May not the destruction of many tumuli be traced to this circumstance, this mould having probably been carted away for manure?

one tumulus was robbed to furnish materials for another.

While it is evident, that many Celtic tumuli which have been explored were formed at a time when the Britons were living undisturbed, it may be presumed, that others were raised over the remains of those who were engaged with the legions of Cæsar. Of these, a large barrow in Iffius Wood, about two miles south-east of Canterbury, may have been an example. It was opened, about four years since, by Mr. Bell, who discovered within it five large urns.

“ Four of the five urns thus brought to light were precisely alike in size and form; but the fifth was much larger, and slightly different in shape and ornament, the former being eighteen inches in height and thirteen inches in diameter at the broadest part, and the latter not less than twenty-five inches in height and twenty-two in diameter. The material of which they were composed was of the rudest description, consisting of half-baked clay, mixed with numerous fragments of silex, which crumbled at the touch, so that their removal entire was impossible. The urns were all found with their mouths downwards, filled with ashes, charcoal, and minute fragments of bones. The contents of the larger urn were perfectly dry, and the portions of bone were larger; but those of the smaller ones were

very moist, and of the consistence of paste. The mouths of the urns were closely stopped with unburnt clay, which appeared to have been firmly rammed in. Not a vestige of any weapon, bead, or other ornament could be discovered. The soil of which the barrow was formed was most excellent brick earth, which appeared perfectly well tempered and fit for immediate use, without further preparation, and contained not a single pebble larger than a bean; and not more than half a dozen of these were found after removing the first few inches of soil. Some of the urns, when uncovered, were found leaning to one side; and, by the impressions made in the surrounding clay, were evidently cracked on the day of their deposit. It is remarkable that nothing was discovered in the western half of the barrow. The urns (the only ornament on which was a row of indentations, apparently made with the end of the finger,) were standing on nearly the same level as the surrounding ground, which, on digging into it, appeared not to have been disturbed."²⁴

The chief peculiarity in the construction of this tumulus is the absence of stones or flints, a heap of which is so often found in the barrows of Wiltshire and Dorsetshire.

²⁴ *Archæologia*, vol. xxx. pp. 57—61.

The following sketch indicates the relative positions of the urns,²⁵ and shews the necessity of observing the greatest caution in explorations of Celtic tumuli.

²⁵ When opening several barrows on the South Downs, some years since, we found one which had been partly explored, two trenches having been cut through it at right angles, perhaps by some person who had been accustomed to researches in Anglo-Saxon tumuli. In one of the angles of the mound, which had been left intact, we discovered a very perfect urn filled with bones, and deposited with its mouth downwards.

§ 2.

MÆNHIRS OR PEULVANS.

THE Mænhir or Peulvan¹ is a long narrow stone, set upright in the ground, generally with the small end downward. As Mænhirs are the simplest form of Celtic monuments, they are doubtless among the earliest, and may have been erected to commemorate a victory, to mark a boundary, or to cover the remains of some person of eminence. Excavations beneath the stone may sometimes determine which of these events has led to the erection of a mænhir. The discovery of bones, horns and tusks favours the inference, that the stone was raised over the dead. When warlike implements are found, the monument may record some solemn compact. If, on the contrary, no relics whatever are discovered beneath them, we are left to conclude that they were erected simply as landmarks or boundary stones.

It is very probable, however, that many of

¹ These words are also said to be derived from the Celtic: the first from *mæn*, a stone, and *hir*, long; and the other from *peul*, a pillar, and *man* or *van*, a stone.

what are now termed mænhirs, are, in reality, but the remains of more extensive works which perished when Christianity supplanted Paganism. In the year 452, the Council of Arles, and in 567, those of Toledo, threaten with excommunication any bishop who shall not use his utmost to destroy all objects of idolatry, among which stones are enumerated. Chilperic, in his charters, enjoins the destruction of the stone monuments which cover the land. The Anglo-Saxon laws also forbid the worship of stones;² but, as soon as Christianity had been firmly planted in Europe, the Pagan temples were destroyed or appropriated to the worship of the true God; and the stones, held in superstitious veneration by the people were consecrated, and in some cases sculptured with the figure of the cross. Examples of mænhirs thus adapted exist at this day at Carnac, in Brittany, and there is one which has been hewn into the figure of a cross in the same district.³

Near Joinville, in the department of the Meuse, there is a very remarkable example of this description of monument, on which is sculptured VIROMARVS ISTATILIF, i. e. *Viromarus, son of*

² *ƿan ƿurþunga*, Canons of King Edgar, chap. 16; also, *Sæc. Laws of Canute*, c. 5.

³ A cross has been placed on the remains of a cromlech at the entrance of Carnac.

Istatilius, probably commemorative of the son of some Gaulish chief subject to the Roman power.⁴

At Rudston and Boroughbridge, in Yorkshire, are supposed examples of *mænhirs*. Near the latter place there are four standing in a row, which are called by the country people *the Devil's Bolts*; but, from their relative position, it is not unlikely that they are the remains of a large circle.

A *mænhir* stands in the parish of St. Briavel, in Gloucestershire; and at Trelech, in Monmouthshire, are three, which are said to mark the spots on which three chieftains fell in battle with Harold, who defeated the Welsh in that county.

⁴ The Latin formula favours this conjecture. The Gauls, before their subjugation, used the Greek character.—Cæsar, *Bell. Gall. lib. vi. c. 14*. The stone, however, may belong to a later period, like those in Cornwall, of which Borlase has given specimens. Vol. i. p. 391.

§ 3.

DOLMENS, TRILITHS, AND CROMLECHS.

To these primitive structures various names have been given by antiquaries, and much crude conjecture has been hazarded as to the object of their erection. There can be no doubt, however, that they are sepulchres, the earth which once covered them having been removed by time, or by the hand of the spoiler. Thus denuded, they now exhibit but the skeleton of the original structure. Some consist of a single stone, one end of which rests on the ground, the other being supported by another stone placed edgeways. French antiquaries have designated these, *demi-dolmens*; but it seems probable that they are the remains of cromlechs partly destroyed.

The Lichvaen,¹ or Trilith, is, as its name implies,

¹ This word has been derived from the Celtic, *lec'h*, a place or table, and *ven*, a stone; but it is more likely to be from the Anglo-Saxon *lic*, a corpse, and *faen*, dirt or mould. The destruction of these depositories of the dead, on the introduction of Christianity, revealed their contents, and doubtless led to the designation. Antiquaries seem not to bear in mind

a group of three stones, and may be also considered as the remains of a once perfect cromlech.

Cromlechs are often composed of three huge stones, forming a rectangular chamber, roofed by a large one, placed on the top, thus leaving one end open. In others, the chamber is formed of a number of stones, as in some of those recently explored by Mr. Lukis, in the island of Guernsey. To this class belong the grottoes or covered alleys, which are cromlechs or mausolea on a large scale. Of these, that existing at New Grange, near Drogheda, in Ireland, is a remarkable example, and it alone is sufficient to negative the supposition that these structures were originally formed for the celebration of human sacrifices.² "After the investigation," says Mr. Lukis,³ "of about twenty of these chambers of the dead, and examining their contents, the result has been convincing and satisfactory as to their original use; and they can no longer be considered otherwise than as ancient catacombs erected by a remote people." "The first cromlech which was inspected is situated on the summit of a gentle hill, standing in the

the almost universal Saxon nomenclature, which ensued upon the settlement of the Anglo-Saxons in Britain. The last half of the word Cromlech may probably be traced to the same root.

² Views of this curious structure are given in the *Archæologia*, vol. ii., plates xix., xx., xxi., and xxii.

³ *Archæological Journal*, vol. i. page 146.

plain of l'Ancrese, in the northern part of Guernsey. The spot was well chosen, being remarkable at a distance, and the highest ground in the neighbourhood. Large blocks of granite are here and there visible on the sides, and in their form resemble the quiet resting-place now described. Five large cap-stones are seen rising above the sandy embankment which surrounds the place; these rest on the props beneath, and the whole catacomb is surrounded by a circle of upright stones of different dimensions. The length of the cromlech is forty-one feet from west to east, and about seventeen feet from north to south, on the exterior of the stones. At the eastern entrance, the remains of a smaller chamber are still seen: it consisted of three or four cap-stones, and was about seven feet in length, but evidently within the outer circle of stones. At the period it was constructed, the sea was at a greater distance from the site of the hill than at present; for the whole neighbourhood bears marks of the inroads of that element: the near approach of the sandy hills around it was caused by those events which have so materially changed the coast of these islands, as well as that of the opposite continent. The period assigned for this devastation is doubtful; but as early as the fifth or sixth century, the Mont St. Michel, in France, once standing in the *midst of a wood*,

was left *in periculo maris* by the incursions of the surrounding ocean. Before these events, however, happened, the cromlech now spoken of was in existence; and it stood like a faithful guardian of the trust reposed within its sacred limits." He then proceeds with the examination of the interior of the cromlech, which is thus described: "As soon as an entrance could be obtained so as to work the interior, the upper stratum was found to consist of white sand of the same description as that which is universally spread over the land in the vicinity, called the Common of l'Ancrese. The next layer was sand of a dark colour, which appeared to have been silted at an earlier period than the first-mentioned. The same appearances are observed over various parts of the common. Immediately below were found stone, rubbish, and portions of the sides of the cromlech, which had at some distant period fallen in. This mass was accompanied by animal bones: these were chiefly of the horse, the ox, and boars' tusks. After this, followed a dark stratum, containing limpet shells, broken pottery, stones worn on two sides by rubbing for grinding processes, which were called mullars, portions of stone troughs used for pounding, flat stone quoits, animal bones burnt, and stone hammers. The lowest bed now appeared, in which were found jars and vessels of sun-baked

pottery, human bones, burnt and unburnt, mixed with smooth pebbles of dark blue sienite and greenstone, flint arrow-heads, and stone cells. The mass in the centre of the cromlech lay in greater confusion and disturbance than the substances which were found near the sides. On the south side, a flat slab of granite was discovered: it was supported upon small blocks, having the appearance of a diminutive cromlech, and as the inside was still unmolested and free, the first complete jar was removed carefully, with stone and bone ornaments and clay beads. It was then observed, that this lowest stratum lay upon a flat pavement of rude flags of granite, and that the jars and bones were placed in distinct heaps on the floor of the cromlech, and that the rolled pebbles mentioned above had been used to separate them in detached spots. The vessels contained only the dark mass which had fallen in, mixed with limpet shells; but in no instance could be perceived the least vestige of human remains within them. The yellow clay, or original soil, was mixed with the contents, without any sand, exhibiting at once its previous state before the inundations of that substance, as stated above. No vestige of any metal was observed during the examination, and the many rude stone implements found therein, made it evident that none was then in use; many

pieces of clay of a peculiar form were found, from three to six inches in length. These were made by rolling a piece of clay in the hand, and striking each end against a board: they still bear the marks of the inside of the fingers, with the joints and impression of the skin of the maker. The number of human bones found within this chamber were great, and corresponded with the number of vessels of all sizes discovered with them. In the spaces between the props were lodged vases, bones, and skulls, as in a recess, after the manner of a catacomb. No attempt at orientation could be here adopted; and the bones were, from their position, brought to their final resting-place after the flesh had been removed by burning, or some other means. The burnt human bones appeared in distinct heaps, and the jars in contact had partaken of the colour of them. The very perfect calcination which had been adopted, made it difficult to conceive what kind of process had been used. Little or no charcoal was observed; the teeth were of a fine jet black; and the bones of the jaws, greyish white; and, in some instances, tinged with turquoise green colour."

The cromlechs of the Channel Islands appear to comprise nearly all the varieties of this description of monument, observable in France and England. Some are placed east and west, some north and

south, but others are found north-west and south-east, so that we cannot satisfactorily trace design in their position. The huge stone which roofs these sepulchral chambers is supported by others fixed in the ground, generally with the smaller ends downwards. In the interstices of these are placed smaller stones, evidently for the purpose of excluding the superincumbent earth.⁴ The floor of the vault has often a slab or flat pavement, but when this is not found there is generally a firm level area. Mr. Lukis, whose investigation of these remains is characterised by the intelligence and clearness of perception which guided Douglas in his examination of the Anglo-Saxon barrows, naturally concludes that the great number of vessels usually found within these tombs, were intended to contain food and presents as offerings to the manes of the dead, and remarks that "the abundant distribution of limpet shells throughout the cromlechs of the Channel Islands, would, in like manner, lead to the same conclusion, this shell fish having been very generally used as food from the earliest period."⁵

A very remarkable and peculiar description of interment was discovered by Mr. Lukis in

⁴ Borlase mentions several cromlechs in Cornwall, which were, in his day, quite buried under the barrows, p. 223.

⁵ *Archæological Journal*, vol. i. p. 232.

September, 1844, when he explored some remaining portions of the "cromlech du Tus" situated near "Paradis," in the parish of the Vale, in the Island of Guernsey. This cromlech stands within an enclosure or circle of stones about sixty feet in diameter. Many of these stones have been removed from time to time. The length of the cromlech is forty feet from east to west. In one of the latter, which was entirely concealed by turf, and had escaped observation, were found vases, bone instruments, celts and human remains. In the other were discovered two adult skeletons in a kneeling posture, and back to back.

The cavity of the vault was filled up with earth, with which was mixed a number of limpet shells, but no pottery, vases or instruments were discovered.⁵

An example of the chambered tumulus, or cromlech, is noticed by Sir R. Hoare, in which the upright stones, the roof having been dislodged, are seen projecting above the mound of earth. There are several tumuli of this description in the neighbourhood of Abury.⁶

⁵ Journal of the British Archæological Association, vol. i. p. 27.

⁶ Ancient Wilts, vol. ii. p. 102. Near the Castle of Mount Orgeuil in the Island of Jersey, is a circular cromlech called by the country people the Poquelay, which was in this condition until the summer of 1839, when it was opened by a person named Jean Fauville. Within were found remains of

One of the most interesting monuments of this description in England is the cromlech popularly known as Wayland Smith's Cave,⁷ at Ashbury, in the county of Berks. It has been almost demolished, a large quantity of stone having been carted away some years since to build a barn, but enough remains to show the arrangement of the vault. A representation of this cromlech, with the ground plan, from actual admeasurement, are given in plate i., figs. 12 and 13. That called Kits Coty House, about four miles from Maidstone in Kent, is equally well known.⁸ Camden supposes it to have been the tomb of Catigern, a British prince.

The principal cromlechs in Cornwall, a district abounding in Celtic remains, are those at Molfra and Lanyon in the parish of Maddern, "Chun Cromlech," in the parish of Morvah, and "Zennor," or "Sennor Cromlech," near Sennor. The stones called "Men-an-Tol," in the parish of Maddern, are very remarkable, and may possibly be the remains of a very large cromlech. A representation of them

skeletons, urns, celts, etc., but the exploration appears to have been badly conducted. An engraving of the cromlech is given in the *Archæologia*, vol. xxviii. p. 461.

⁷ This is an example of the practice of the Anglo-Saxons of connecting their myths and traditions with monuments which they found in England. Weland was the Vulcan of their mythology. The ground-plan of this cromlech is given in plate i. fig. 13.

⁸ Engraved in plate i. No. 8.

is given in plate i. fig. 9.⁹ A view of the cromlech at Clatford Bottom, near Marlborough, is given in plate i. fig. 11. There are two at Plas Newyd, in the Isle of Anglesea. Of these representations will be found in plate i. No. 10.

In France there are several cromlechs of very large size, particularly the "Pierres plates" at Lockmariaker in Brittany, a neighbourhood in which many Celtic remains exist. There is one called the Grotte aux Fées, near Saumur, and another popularly known by the same designation near Tours, in good preservation, the enormous weight of the stones having probably been their chief protection.

Many cromlechs have been observed in Spain and Portugal. Near Arrayolos, three leagues from Evora, there is a very perfect one, with all the larger stones standing.¹⁰

The remains discovered in cromlechs, like those found in the ordinary tumuli, lead to the same conclusion; namely, that cremation and the interment of the body entire were contemporaneous. Cæsar tells us that the Gauls burnt their dead;¹¹ hence it has been inferred that as the Belgæ were Gauls, the Belgæ of Britain also burnt their dead, and that the Celtic Britons

⁹ Borlase informs us that, in his time, it was supposed that rheumatic persons were cured by crawling through this stone, a ceremony once very common in England, and frequently denounced by the Anglo-Saxon laws.

¹⁰ Kinsey's Portugal Illustrated, p. 514. ¹¹ Bell. Gall. lib. vi.

followed the older method of interment;¹² but, as before noticed,¹³ this is not shewn by the examination of tumuli of each description.

In plate i. figure 14, is a representation of a cromlech called The Trepied, at Catioc, in the Island of Guernsey. Fig. 15, shews the interior of a cromlech explored by Mr. Lukis at l'Ancrese, together with disposition of the urns, etc., found within it.¹⁴

The cut here given, kindly placed at our disposal by the Editor of the *Archæologia Cambrensis*, is a view of a cromlech on Myndd Cefn Ammwlech, in Carnarvonshire. The form of the cap-stone¹⁵ is sufficient to negative the idea of its being an *altar*.

¹⁵ It very much resembles that of the Cromlech in Alderney. *Journal of B. A. Association*, vol. iii. p. 4.

§ 4.

SEPULCHRAL CAVES.

IN the Cambrian Register for 1796, p. 382, is the following passage, which has been quoted by Fosbroke:¹ “The tumuli and cairns were probably the funeral monuments of the ancient chiefs and their immediate dependants. The sepulchres of the commonalty are found upon the hills; where there is a declivity, a slight hollow is to be seen; and the earth heaped below like a small hillock of an oblong form. When these are opened, a stratum of ashes, blackish or red burnt earth is discovered. These sepulchres may be seen in great numbers upon a hill called Pencoed in Llangadfan. All these hollows are graves, and their manner of burial was thus performed: the dead body was laid upon the bare sward, plastered over with clay, and covered over with dry turf; a fire was then made over it with furze, wood, etc., until the corpse was reduced to ashes, or so that the flesh was consumed, and the bones nearly

¹ Encyclopedia of Antiquities, vol. ii. p. 547.

burnt; then the charcoal and ashes were covered with earth, and sometimes stones were laid upon it."

The sepulchral caves recently explored by Mr. Lukis in the Island of Guernsey,² may be classed with this description of interment. "The cists of these islands," he observes, "appear to rank with those of the most unassuming sort; they are, for the most part, dispersed over the land in various directions, without any order, or peculiar disposition, by which they may be known. Whenever these depositories have been found in the vicinity of the more ancient sepulchral monuments, they are evidently unconnected with them, and do not appear as the remains of a more enlightened age of the same people. During a period of twenty years, not less than twenty of these cists have come under my notice, in these islands. They are usually of the same construction, and consist of a stone chest, formed of two parallel rows of stones, fixed on their ends, and covered by similar flat stones, in length about seven feet."

Among the objects discovered in these cists were an urn, shaped like a barrel or keg, of

² Journal of the British Archæological Association, vol. i. pp. 305—308.

black ware, about seven inches high, and surrounded by hoops or rims; spear heads, fragments of knives, a sword in an iron scabbard, thirty-four inches long, part of an iron armlet, and a clay bead. No traces of human remains were discovered, but several fused masses like clinkers appear to shew that, to whatever period these interments may be assigned, cremation was the mode of sepulture. The various objects in metal seem to indicate a later era than that of most of the Celtic remains more familiarly known to us.

Allied in some respects to the same mode of sepulture, and differing from that of the tumulus and the cromlech, is the tomb discovered in 1839 at Herouval, near Gisors, in the department of Eure. In a deep cavity cut in the rock, six pairs of large stones, their tops resting against each other, so as to form a sloping roof, covered as many skeletons, which appear to have been deposited entire.

§ 5.

ROCKING STONES.

THESE singular monuments, in England termed *Logan-stones*, and in France *Pierres-branlantes*, are yet enigmas to antiquaries. Their origin and use are involved in doubt and mystery. As the name implies, rocking-stones consist of huge blocks, so poised on the ground, or on other stones, that the slightest force will cause them to oscillate. In the absence of any evidence as to their use, much conjecture has been hazarded. One writer supposes them to have typified the world in space; another considers them as probationary stones, by which the guilt or innocence of the accused was tested. They are mentioned by Pliny¹ as existing in Asia; and Apollonius Rhodius² speaks of stones placed on the apex of tumuli, and moving with

¹ One at Harpasa could be moved by the finger, but not with a violent push:—"Cautes stat horrenda, uno digito mobilis: eadem, si toto corpore impellatur, resistens." Hist. Nat. lib. ii. c. 96.

² Argonaut. lib. i. 1071.

the wind.³ Rocking-stones are also found on the continent of America,⁴ so that their use at one period of the world was universal.

One of the most remarkable rocking-stones in England, is that at West-Hoadley, about four miles south of East Grinstead in Sussex, termed by the people of the neighbourhood "great upon little." In shape it somewhat resembles a boy's humming-top, and it is poised on a very low convex stone. Its height is about twenty-three feet, and its weight is estimated at nearly five hundred tons.⁵

There was a famous rocking-stone called "Men Amber" in the parish of Sithney in Cornwall, which Borlase informs us was destroyed by fanatics in the time of the Commonwealth, on account of the reverence in which it was held.⁶ That at Constantine in the same county is well known; and at St. Agnes in the island of Scilly is another.⁷ The former is represented in our plate ii. fig. 19.

Rocking-stones are found in various parts of France. A very fine one exists at Perros-Gwyrech (Côtes du Nord). Its form is a rudely

³ The famous Agglestone Barrow, in the island of Purbeck, seems to have been constructed on this principle.

⁴ Hodgson's letters from North America, vol. ii. p. 440.

⁵ Archæologia, vol. vi. pp. 54—60.

⁶ Borlase, plate xiii.

⁷ Ibid. plate x.

shaped rhomboid, and it rests on a stone still larger. Though it can be moved by one person, its weight is estimated at five hundred tons. In Brittany there are several examples, the largest being at Kerisquillien and Trecuny, near Concarnea.

There is a very large rocking-stone in Spain, near Cape Finisterre, close by the chapel of Notre Dame de la Barca, which can be moved by a child.

Whatever may have been the origin and use of these stones, there are some grounds for supposing that they were suggested by the natural cleavage and decrepitation of rocks. The singularly formed rocks at Brimham near Harrogate, will remind the beholder of those rocking-stones,⁸ the formation of which has been assisted by the hand of man.

⁸ See the engraving in the Journal of the British Archaeological Association, vol. i. p. 85.

§ 6.

STONE CIRCLES AND AVENUES.

ALTHOUGH, as before observed, the stone circles are, perhaps, for the most part, but the bases or outlines of cairns and cromlechs, once existing, it cannot be denied that some of them may be traced to another origin. The vast circles of Abury, Stone-henge and Carnac, suggest a different explanation; but to whom shall we look for it? Who will afford us a *rational* account of these huge monuments of a people who had no written history?

Our limits will not allow of our giving a detailed account of the various dissertations which have been written, with the object of explaining the origin and use of these wonderful structures, which are likely to remain enigmas, to the end of time. Inigo Jones, Stukeley, Sir Richard Colt Hoare, and Higgins, have each given us elaborate essays, in some of which fancy usurps the place of fact, and illogical conclusions are manifest in almost every page.¹

¹ In the 28th volume of the *Archæologia*, is a paper by Mr. Rickman, on the antiquity of Abury and Stonehenge, which is attributed to the third century of the Christian era!

Stone-henge has been derived by antiquaries, somewhat oddly, from the Saxon *stanenhangen* or *hanging-stones*.² By older writers, it is called "Choir Gawr" or "Chorea Gigantum." Camden styles it *insana substructio*. From the remains still occupying the area in which it stands, it appears to have been composed of four concentric circles. The diameter of the outer circle is one hundred feet, and it would seem originally to have been formed of thirty erect-stones, of which seventeen only are now standing. Their average height is about fourteen feet; their sides average seven feet by three. These stones, rudely shaped into piers, supported others fixed by tenons and joined by mortices, and thus united formed an architrave. The inner circle is about eight feet within the outer one. But the engraving will give a better idea of the structure; of which, however, but a small portion remains: see plate ii. Nos. 16 and 17, in which are given a view from the west and the ground-plan of its actual state.

The area of the circle of Avebury or Abury, five miles west of Marlborough, is fourteen hundred feet in diameter. Its avenues extend for a mile on each side. The great circle is

² Here the Celtic etymologists are at fault, and consequently we have a *Saxon* and not a Celtic derivation.

surrounded by a mound of earth, within which is a ditch. The circumference of the fosse was estimated by Gale at four thousand feet, and the diameter of the circle at fourteen hundred feet. Within this inclosure were two smaller circles, each consisting of two concentric circles of stones. In its present state it would be difficult to verify this account. A ground-plan is given in plate ii. No. 18.

Another remarkable example of these inclosures exists at Stennis, in the Orkney Islands. Its circle is about three hundred feet in diameter, and about fourteen of the stones are still erect. It is surrounded by a fosse, and standing conspicuously on the shore, has a most picturesque appearance. Among the other remains of this description, may be mentioned those called the "Nine Ladies" on Stanton Moor in Derbyshire; the nineteen erect stones called "Dance Maine," at Boscawen in Cornwall; and the Roll-rich stones, originally sixty in number, near the banks of the Thames, eleven miles S.W. of Banbury in Oxfordshire.³ At Salkeld near Carlisle are the remains of a circle consisting of seventeen stones. That of Fiddes-hill, on a mountain in the highlands of Scotland, consists of fourteen

³ Engraved in Gough's Camden, plate xv. pp. 285 and 294; see Munim. Antiq. vol. i. p. 199. A circle of stones formerly stood in the parish of Town-Malling, in Kent.

stones, one of which is of enormous size. It differs from all the others in not being a perfect circle.

Some antiquaries have supposed these extraordinary structures to have been the temples of the primeval inhabitants of Britain; others have considered them as the places appointed for solemn assemblies: it seems likely that they were appropriated to both these purposes. More than one writer has attempted to show that the disposition of these stones has reference to the planets of our system.

Among other arguments advanced in favour of this last opinion, is that of stone circles being termed by the Irish *Carrick Brand*, and by the Welsh, *Cerryg Brudyn*, both signifying, it is said, astronomer's circles. But those who maintain this, neglect to inform us at *what period* such appellations were bestowed upon these monuments, the precise origin of which was probably not clearly understood even in the days of the later Romanised Britons. It is evident, that on the arrival of the Saxons, they connected their legends and myths with localities in this country, which would scarcely have been effected if anything more than vague tradition had been found attached to them. The Roman polytheism had supplanted the religion of the Celts, and, in its turn, had been assailed by the spread of

Christianity. In the lapse of time, and the current of events, such of the superstitions of the primæval age as remained, had become blended with those of the civilised conquerors; and the temples and tombs of an unlettered race, destitute of effigies and inscriptions, were ascribed to supernatural architects, to giants and demons.

Like other primæval monuments, stone circles are found in almost every part of the known world. There is one on a high hill about a mile from the town of Hudson, in the state of New York, and another on a lofty rock on the river Winipigeon.

The well-known inclosure called the Tynwald,⁴ in the Isle of Man, may be noticed in this section. Though generally classed with earth-works, the huge trilith (two stone pillars capped by a transverse stone) at the entrance, and another at the opposite side, warrant this arrangement; for we cannot be certain that a stone circle like that of Abury did not once surround

⁴ Here again antiquaries have sought a Celtic root for this word; and even the acute and sensible Douglas stumbles at the derivation, which is clearly from the Saxon *tynan*, to *enclose*, and *peal*, a *wall* or *rampart*; a word sufficiently descriptive of this enclosure. To *tyn*, is still used by the country people in the West of England.

the whole. Within this inclosure the ancient kings of the island were crowned.

On Carnbre hill, near Redruth in Cornwall, are many traces of a series of stone circles and avenues: the neighbourhood indeed abounds with remains of this description.

Several stone circles exist in this county. One at Bolleit, in the parish of Burian, is called "Dance Maine."⁵ Another at Sancrod is known by the name of "Boscawen un:" a third is in the parish of Maddern, and a fourth at St. Just. Drawings of these were made by Mr. Cotton, in 1826.⁶

In the museum of the Society of Antiquaries of London, is a model of the famous stone inclosure near Saint Heliers in Jersey.

⁵ The popular tradition in the district is, that these stones were men, who profanely danced on the sabbath. The two stones outside the circle, and which appear to have marked the entrance, are conjectured to have been the pipers who played the unhallowed measures!!

⁶ Illustration of stone circles, cromlechs, etc., in the west of Cornwall. London, 4to. 1847.

§ 7.

COLOSSAL FIGURES CUT IN THE CHALK HILLS.

THE practice of the Anglo-Saxons, already alluded to, of connecting their myths with the most remarkable monuments found by them on their arrival in this country, has given rise to traditions, which may at first appear to be purely local, but which further enquiry will discover to be the remains of popular superstitions of a remote period. In this way, as already observed, the well-known cromlech at Ashbury, in the county of Berks, popularly termed "Wayland Smith's cave," has been associated with Weland, the mythic smith of the Pagan Saxons; and, in all probability, the famous white horse at Uffington, in the same county, cut in the chalk of the downs, has, by a similar mode of adoption, been attributed to a much later period than that to which it doubtless belongs, and ascribed to the great Alfred, as a monument of his victory over the Danes in that neighbourhood. But the style alone of this rude figure, of which a representation is here given, from actual admeasurement, would be sufficient

THE WHITE HORSE AT UFFINGTON, BERKS.

C. Edmunds del.

(EXTREME LENGTH, 32½ FEET.)

to justify our classing it with monuments of the Celtic period.¹

The horse being a well-known Saxon symbol, or device, has greatly favoured the popular appropriation; but the fact, that this animal is a very conspicuous object on the coins of the Gauls, and the ancient Britons, previous to the establishment of the Romans in this island, is sufficient to cast a doubt on its reputed Saxon origin. The very striking resemblance in the style of this rude figure to attempts to represent a horse on the early money of the ancient Britons, is another argument against the popular tradition. At any rate, if really Saxon, its barbarous execution would not justify our assigning it to the days of Alfred, but rather to Pagan Saxon times.

To the same class belongs the gigantic human figure, armed with a club, carved in the Chalk-hill, at Cerne-Abbas, in Dorsetshire.²

¹ For the loan of this cut, illustrating a paper by Mr. Thoms on these representations of horses in England, in vol. xxxi. p. 289. of the *Archæologia*, we are indebted to the council of the Society of Antiquaries.

² Hutchins, in his *History of Dorsetshire*, gives in detail the dimensions of this figure, the height of which is 180 feet.

§ 8.

FORTS, CAMPS, AND BEACONS.

OF these the most remarkable, and the most perfect, is that termed the Herefordshire Beacon, consisting of a triple rampart, crowning one of the Malvern hills. Conspicuous, but less perfect, examples may be seen in various parts of England and Wales, among which may be noticed the Little Doward, near Monmouth, which, like that above-mentioned, is surrounded by three terraces. Near Basschurch, in Shropshire, are earth-works, supposed to have been formed by the Ancient Britons, and at Sutton-Walrond, in Dorsetshire, are two hills exhibiting specimens of presumed Celtic castrametation. Mr. Beesley, in his history of Banbury, in Oxfordshire, has given several very interesting ground-plans of presumed British camps, at Tadmorton, Nadbury, Gredenton, Ilbury, and Ramsborough;¹ and several views of similar intrenched hills in Wiltshire, may be seen in

¹ History of Banbury, plates ii. iii. v.

Hoare's history of that county. These camps have, sometimes, only one entrance, and in this respect differ widely from those of the Romans, whose military works were disposed at right angles, and in this respect are easily distinguished from those of the ancient Britons, whose camps and earth works are formed in circles;² but it is probable that the plans of many of them were modified during the Roman and Anglo-Saxon periods.

Antiquaries have attempted to distinguish between those entrenched posts which were fortified permanently,³ and those in which the Britons sought temporary retreat and shelter after defeat, founding their opinions on the existence of cells and excavations on the hill-side; but their remarks have shed little light on the subject.

² Probably some of these earth works were formed in districts remote from fortified towns, even in the days of the Anglo-Saxons, as a feeble protection for their women, children, and flocks, when the merciless Danes were ravaging England.

³ An assemblage of huts or cabins formed the *vicus* of the Gauls and Britons; but when surrounded by entrenchments, they constituted an *oppidum*. Cf. Cæsar, De Bell. Gall.

§ 9.

OBJECTS OF THE CELTIC PERIOD.

I. URNS.

THESE, as before observed, are generally discovered in Tumuli with the *mouths downwards*, and are sometimes stopped with clay. Sometimes they are found standing upright in cromlechs covered with a flat stone. Examples of Celtic urns are engraved in plates ii. and iii. A list is here given, and the places of their discovery noted.

PLATE IV.

II. STONE CELTS.

These are found throughout Great Britain and Ireland, and the whole continent of Europe. They are formed of nearly every description of stone. Mr. Lukis states that those which have come under his observation in the Channel Islands, consist of many varieties, among which are 1. indurated clay-stone, 2. granular porphyry, 3. trap green-stone, 4. green-stone, 5. sienite, 6. silicious schist, 7. clay-stone, 8. indurated clay, 9. red iron stone, 10. serpentine, 11. jade, 12. quartz, 13. yellow horn-stone.

III. IMPLEMENTS AND WEAPONS OF STONE
AND FLINT.

- $\left. \begin{array}{l} 1 \\ 2 \\ 3 \end{array} \right\}$ Stone celts from Barrows in Wiltshire, of the ordinary
types found throughout Europe.

² This urn is altogether remarkable for its elaborate ornaments, which are even extended to a circular groove within its mouth. It is formed of clay and imperfectly baked.

- 12 Stone axe head from a Barrow at Upton Lovel. Hoare,
pl. v.
- 13 Arrow head of flint. These are found in Barrows of
the Celtic period throughout Europe.
- 14 Lance head of flint from a Barrow in North Wilts.

IV. IMPLEMENTS AND WEAPONS OF BONE.

- 15 } Implements of bone, found with a skeleton at Upton
- 16 } Lovel. Hoare, plate vii. More than three dozen of
- 17 } these were discovered in the same Barrow.
- 18 }
- 19 Brass pin, with an ivory handle, from a Barrow at
Winterbourn Stoke. Hoare, pl. xv. It was found
with the urn No. 32.
- 20 Lance head, from a Barrow in North Wilts.

V. BRONZE CELTS, ETC.

Much has been said and written on these objects found so frequently in Great Britain and Ireland, and indeed throughout Europe. Some

have supposed them to be offensive weapons; others have contended that they are tools serving the united purposes of an axe and a chisel.

- | | | |
|----|---|--|
| 21 | } | Examples of brass or bronze celts, of the types usually discovered throughout England and Ireland, and the Channel Islands and the Continent. Nos. 29, 31, 32, 33, are of very common occurrence, but No. 30 is remarkable for the rings attached to it. Mr. Britton possesses an ancient mould for casting celts. |

PLATE V.

VI. DAGGERS, SWORDS, AND SPEAR HEADS.

Daggers fitted in wooden or ivory handles are sometimes discovered in Celtic tumuli. Several of these are given in our plate. They appear to belong to a much earlier period than the bronze

swords of the type of the two here represented,³ and which were found in the bed of the Thames near Vauxhall.

None of these British weapons agree with the accounts of historians. The shield No. 49, alone answers to the description which Tacitus gives of the arms of the Britons. The short dagger-like objects, Nos. 40, 41, 42, 43, are the arms of barbarians, but the sword and spears, Nos. 44, 45, 48, are formidable offensive weapons, modelled after, and doubtless casts in bronze⁴ of, the iron arms of a more civilised people, and well fitted for human slaughter; but the shield alone agrees with the historian's description.⁵ The sword, large and blunt at the point (*sine mucrone*), seems rather to have its representative in those

³ For the loan of this cut we are indebted to the council of the British Archæological Association.

⁴ In the Archæologia, vol. xv. pl. xxxiv., is a representation of a stone mould for casting spear-heads.

⁵ *Ingentibus gladiis et brevibus cetris.*—Vita Agricolaë, § 36.

discovered in the Barrows of the Anglo-Saxon period, than in these acutely-pointed and formidable weapons equally adapted both for thrusting and striking.⁶

- 45 Bronze spear head discovered in Derbyshire. Journal of the British Archæological Association, vol. ii. p. 280.
- 46 Handle of a dagger, ornamented with minute brass pins in a very elaborate and tasteful manner. From a Barrow in North Wilts.
- 47 Bronze dagger with ivory handle, found with two small bronze spear heads in a Barrow at Blandford, in Dorsetshire. Journal of the British Archæological Association, vol. ii. p. 98.
- 48 A bronze sword, found in the county of Tyrone, Ireland, with spear head No. 44.
- 49 Bronze Buckler, found in the ancient bed of the river Isis, near Dorchester, in Oxfordshire. Its diameter is only fourteen inches, and it differs not only in size, but in the dimensions of the studs, from the specimens of British shields in the collections of Sir S. Meyrick and Mr. C. R. Smith. Archæologia, vol. xxvii. p. 298.

⁶ These swords, when found in tumuli, are generally broken, evidently designedly. This was a ceremony observed by the ancient Egyptians. The late Rev. J. V. Arundale shewed me a long scabbard discovered by him in a tomb at Thebes, which had been broken in half and laid on the body.

- 50 Amber ornaments, found in a Barrow at Lake, Wilts.
Hoare, pl. xxxi.

PLATE VI.

VII. MISCELLANEOUS OBJECTS.

- 71 Bracelet, from a Barrow at Shrewton, Wilts. If British, of a very late period.
- 72 Vitrified bead from a Barrow at Winterbourn Stoke. Hoare, pl. xiv.
- 73 Circular plate of gold found with Nos. 75, 76 and 104.
- 74 Small cone of ivory or bone from a Barrow at Sutton-Veney. Hoare, pl. xviii.
- 75 } Objects in fine gold from a Barrow at Upton Lovel.
76 } Hoare, pl. x. With these were found thirteen gold beads (of the pattern No. 61), and the gold plate engraved No. 104.
- 77 Cone-shaped ornament of wood plated with gold found with No. 78.
- 78 Ornament of brass covered with a thin plate of gold from a Barrow at Normanton. Hoare, pl. xxv.
- 79 Brass pin from a Barrow at Amesbury, North Wilts. Hoare, pl. xxiv.
- 80 Instrument of brass from a Barrow at Brigmilstone, North Wilts. Hoare.
- 81 Instrument of brass from the same locality as the preceding.
- 82 Brass pin from a Barrow at Stonehenge. Hoare, xvii.
- 83 Ivory tweezers found with No. 103.
- 84 Ivory tweezers from a Barrow at Knook Upton Lovel, Wilts. Hoare, pl. ix.
- 85 Ivory bodkin from a Barrow at Lake, North Wilts. Hoare, pl. xxx.
- 86 Bone ornament from a Barrow at Normanton, North Wilts. Hoare, pl. xxvii.
- 87 Unknown object in jet, from a Barrow at Normanton, Wilts. Hoare, pl. xxv.

- 88 Gold ornament found in a Barrow at Lake, North Wilts.
Hoare, pl. xxxi.
- 89 Ornament of amber set with gold, from a Barrow at
Normanton. Hoare, pl. xxv.
- 90 Unknown object of ivory resembling the handle of some
vessel. From a Barrow at Amesbury, Wilts.
Hoare, pl. xxiv.
- 91 } Objects of bone found in a Barrow at Lake, North Wilts,
92 } and supposed to be used in casting lots. Hoare,
pl. xxxi.
- 93 Whetstone, from a Barrow in North Wilts.
- 94 Fragment of a bone ornament, from a Barrow in North
Wilts.
- 95 Small slab of blue slate perforated and probably worn
as an ornament. From a Barrow on Mere Down.
Hoare, pl. ii.
- 96 Whetstone, from a Barrow in North Wilts.
- 97 Stone from a Barrow at Upton Lovel. Hoare, pl. v.
- 98 Stone celt (?) from a Barrow at Upton Lovel. Hoare, pl. vi.
- 99 Slab of perforated blue slate, from a Barrow at
Sutton, North Wilts. Hoare, pl. xii. The skeleton
with which it was found had its head to the north
and its legs gathered up.
- 100 Jet ornament found in a Barrow at Woodyates, Wilts,
with a brass dagger and flint arrow-heads. Hoare,
pl. xxxiv.
- 101 Whetstone from a Barrow in North Wilts.
- 102 Circular stone found with a skeleton in a Barrow at
Upton Lovel. Hoare, pl. vi.
- 103 A personal ornament formed of six pieces of amber,
from a Barrow at Kingstone Deverill. Hoare, pl. iii.
- 104 Gold plate, probably worn on the breast, found, with
gold beads and other gold ornaments, in a Barrow

- at Upton Lovel, in North Wilts. Length six inches, breadth nearly three inches. Hoare, pl. x.
- 105 Lozenge-shaped gold plate, found in a Barrow at Normanton, North Wilts, with No. 107.
- 106 Circular personal ornament of amber set round with gold, from a Barrow at Normanton. Hoare, pl. xxv.
- 107 Gold plate, probably worn suspended on the breast. Found in a Barrow at Normanton, North Wilts. Hoare, pl. xxvii.
- 108 Gold ornament, supposed to have decorated the sheath of a dagger, the handle of which is engraved on a larger scale in No. 46. Found in a Barrow at Normanton, North Wilts.

PLATE VII.

- 109 } Gold personal ornaments found under one of the largest
 110 } blocks in the centre of a stone circle near Quentin
 111 } in Brittany, in the year 1832, by a peasant searching
 112 } for treasure.⁷ These objects are supposed by the
 113 } Rev. J. B. Deane, who communicated an account of
 114 } them to the *Archæologia*, vol. xxvii. p. 1—14, to be
 115 } the *μaviaκαί*, which Greek historians tell us were
 116 } worn by the Gauls: and which term they use as
 117 } distinguishing them from the Roman *torques*, which
 were formed of twisted bars of metal. No. 117, resembles the objects termed “ring money,” so often found in Ireland.
- 118 Thin broad bracelet found at Carnac, in Brittany, weight 4oz. 8dwts. 8gr.

⁷ The weight of the lightest is, or rather *was* (for they have been consigned to the crucible!) 11oz. 10dwts., and that of the heaviest 3lb. 8oz. The value of the whole in bullion was upwards of one thousand pounds!

§ 10.

COINS.

THE accuracy of the commonly received text of Cæsar has been impugned by Mr. Edward Hawkins, in an interesting article in the Numismatic Chronicle,¹ and it has been maintained that the Britons had a coinage of their own, previously to the first descent of the Romans; but the fact is certainly not proved by existing examples. It has been held, that the early British coins are not formed on the Roman, but on the Greek model, being convex and concave; but as many of the consular series are characterised by this form, it cannot be considered as exclusively Greek; and the fact that the coins of Cunobeline invariably bear Roman characters,² and that others, uninscribed, are palpably *rude imitations* of them, is certainly against the supposition that the Britons had a coinage previously to the arrival of Cæsar. The barbarous coins peculiar to the Channel islands,³ appear to be of an earlier

¹ Vol. i. p. 13.

² Ancient Coins of Cities and Princes, plate xxiii., figs. 1—25, and plate xxiv. figs. 1—18.

³ Numismatic Chronicle, Vol. I. pl. i. fig. 12.

date than those found in Britain, and were probably copies of the rude currency of Brittany; but the British coins, to which a high antiquity has been assigned by some antiquaries, appear to be successive copies of copies, until the prototype can with difficulty be traced. This subject has been discussed at some length elsewhere,⁴ and the writer has since seen no reason to change the view he has taken, but, on the contrary, everything has tended to confirm the opinion he has ventured to give as to the age of Ancient British Coins.

The stamped currency of the Britons appears to date from the period of Cæsar's invasion to the reign of Augustus, when Cunobeline issued a number of coins of a singular variety of types, some of which are evident copies of Roman Denarii.

Some writers have maintained that the bronze and gold rings discovered in Ireland, occasionally in great numbers, were designed by the inhabitants as circulating media; but, although objects of this description were applied to the purposes of money, of which practice it would be tedious to cite examples, both from sacred and profane history, they cannot be regarded as actual coins.

⁴ Ancient Coins of Cities and Princes, pp. 177—182.

PART II.

ROMAN-BRITISH PERIOD.

§ 1.

SEPULCHRAL INTERMENTS.

THE Roman mode of interment differed both from that of the Celtic tribes and that of the Anglo-Saxons. The erection of tumuli over the remains of the dead, must be regarded as an exception to the general mode of sepulture of the former people¹, and considered as honourable memorials. It is probable that in Britain they covered the remains of those who had fallen in battle.

Roman sepulchres are particularly distinguished by the absence of weapons; but implements and utensils are very frequently found in them. The Roman tumuli at Bartlow, in the parish of Ashdon, in Essex, contained many objects of the greatest interest; vases, strigils, lamps, and a folding chair, or stool, but no offensive or defensive weapons.²

¹ The law of Solon, which interdicted the raising of *επιμνηναι* on account of the space which they would occupy on the land in the course of time, was adopted by the Romans before the time of Cicero.

² Archæologia, vol. xxv. and vol. xxvi. pp. 299—317.

At Litlington, near Royston, is a Roman Ustrinum, or burial-place, perhaps one of the most perfect in England. The walls, or boundaries, may yet be traced. It is of rectangular shape, and its dimensions are about 390 feet. Numerous urns have been found here from time to time, and also skeletons, which shew that cremation was not the sole mode of interment,³ though the most common. A great quantity of ashes, the remains of the funeral piles, was discovered in two of the angles of the enclosure.⁴ The interments were of the most simple character. The urns appeared, in most instances, to be merely covered with a tile, and rarely deposited in a chest of wood; and there is every reason to suppose that the area was the common burial-place of the neighbourhood. The interments of persons of rank or condition are indicated by the objects deposited with the dead, which in the vault beneath the principal Bartlow tumulus, were numerous and interesting. Fig 2. plate vii. shews the relative position of these objects in the principal tumulus.

³ Archæologia, vol. xxvi. pp. 368—376. Might not these skeletons be the remains of Christians, who rejected the Pagan rites of sepulture?

⁴ In these corners there appeared no traces of interment; and it is probable they were reserved for the usual ceremony of burning the body.

Another mode of interment was discovered at York, and is fully described in the *Archæologia*.⁵ A few tiles placed edgewise, like the roofing of a house, covered an urn containing the ashes of an officer of a legion. See plate viii. fig. 6.

In 1817, a Roman sepulchre was discovered at Avisford, in Sussex. It is described by Mr. Smith, in his *Collectanea Antiqua*,⁶ and illustrated by a plate from which our own is a copy on a reduced scale. Plate ix. fig. 2, shews the disposition of the various objects within the tomb.⁷

Leaden coffins, of the Roman period, have sometimes been discovered in England. That engraved in our plate ix. fig. 3, was found near Colchester.⁸

⁵ Vol. ii. page 297, plate x.

⁶ *Collectanea Antiqua*, part viii. pl. 44.

⁷ These objects consisted of a large square green glass vessel containing calcined bones; several small earthen vases and pateræ; a pair of sandals covered with hexagonal brass nails; three lamps and four slipper boats, or lamp stands, placed severally on brackets at each corner of the sepulchre. There was also an agate or crystal of the shape and size of a pigeon's egg.

⁸ See Mr. C. R. Smith's notice in the *Journal of the British Archæological Association*, vol. ii. p. 297, where other examples of leaden coffins of the same character are engraved and described.

§ 2.

SEPULCHRAL INSCRIPTIONS.

SEPULCHRAL inscriptions, of the Roman-British period, have often been discovered in England, and some of them are of great interest, affording, as they do, the best evidence, not only of the Roman occupation of Britain, but also of the location of the legions of the masters of the ancient world, and memorials of the natives of the different countries once included in their vast empire, whether employed in the affairs of civil life, or incorporated in their gigantic armies.

Three very interesting sepulchral slabs were discovered in the years 1835-6, at Watermore, near Cirencester. Two of them were the memorials of individuals in the Roman army, and had sculptured equestrian figures spearing a prostrate enemy. The first inscription was as follows:—¹

¹ See pl. viii. fig. 3.

DANNICVS. EQES. ALAE.

INDIAN. TVR. ALBANI.

STIP. XVI. CIVES. RAVR.

CVR. FVLVIVS NATALIS. IL.

FLAVIVS BITVCVS ER. TESTAME.

H. E. S.

Danicus eques Alæ
 Indianæ, turmæ Albani
 Stipendiorum sedecem, civis Rauricus.
 Curaverunt Fulvius Natalis il [lege ET?]
 Flavius Bitucus, heredes testamentarii
 Hic situs est.²

These monuments have been very ably illustrated by Doctor Conrad Leemans, of Leyden, in a communication to the Society of Antiquaries.³ This gentleman observes that the *ala Indiana*, or the Indian wing of auxiliary horsemen, is mentioned in an inscription found near Cologne, and published by Gruter,⁴ Orellius,⁵ and Muratori,⁶ who also cite inscriptions to other persons connected with the same *ala*. This inscription gives us the name of another individual of the *turma Balbi*. The Raurici, a people of Gallia, were the neighbours of the Sequani, who were like them subjected by Cæsar. The two letters

² i.e. "Dannicus, a horseman of the Indian wing of the troop of Albanus, who has served sixteen years, a citizen of Rauricum. By the care of Fulvius, Natalis, and Flavius Bitucus, the heirs of his last will. He is buried here."

³ Archæologia, vol. xxvii. pp. 211—228.

⁴ p. DXIC. 7. ⁵ Insc. Select. p. 192. ⁶ p. MDCCLXXVII.

IL are supposed to occur for the particle ET, unless they are clearly deciphered, and stand for IL *lyrius*. The omission of the v in EQES, and of the h in ERES⁷ (*i.e.* HERES), in this and the next inscription, are not peculiar. In this instance they are, by the learned Doctor, attributed to the circumstance of the monuments having been executed by persons but imperfectly acquainted with the Roman language, and at a great distance from the seat of the Roman empire.

The second monument bore the inscription:—

SEXTVS. VALE.

RIVS. GENALIS.

EQES ALAE TR. HAEC.

CIVIS FRISIAVS. TVR.

GENIALIS AL. XXXX....XX.

H. S. E. E. F. C.

Sextus Valerius.

rius Genialis

Eques alae Thracum [or Thracum Heraclaniæ?]

Civis Frisiaus, turmae

Genialis. Annos [vixit]

Quadraginta, [militavit] viginti

Hic situs est; heres fieri curavit.⁸

⁷ The expressions *heres testamentarius curavit* and *heredes testamentarii, heredes ex-testamento curaverunt*, occur perpetually on Roman sepulchral tablets; it being generally made the condition on which the heirs of the testator inherited his property. The emperor Antoninus made this imperative on the parents of a soldier, who were his natural heirs.

⁸ *i.e.* "Sextus Valerius Genialis, a horseman of the Thracian,

The third monument⁹ bore the sculptured figure of a man in a civic habit, and the inscription:—

PHILVS CA
SSAVI. FILI.
CIVIS. SEQV.
ANN. XXXXV.
H. SE.

Philus Ca
ssavi filius
Civis Sequanus (vixit)
Annos quadraginta
Quinque. Hic sepultus est.¹⁰

A sepulchral stone of the same character as the two former ones, was discovered a short time since near the spot where the Cheltenham road diverges from the Irmin Street.¹¹ It bore the sculpture of a helmed equestrian figure spearing a prostrate enemy, who grasps a short sword or dagger, and the inscription:—

or Heraclania-Thracian wing, a citizen of Frisia, of the troop (or squadron) of Genialis. He lived forty years and served twenty. He is buried here. His heir erected this."

⁹ i.e. Engraved in our pl. viii. fig. 4.

¹⁰ Philus the son of Cassavus, a citizen of the Sequani, forty-five years old, is buried here.

¹¹ Journal of the British Archæological Association, vol. i. p. 238.

Aurelius Pavius, CONTVGI INCOMPARABILI, CVM QVA VIXIT ANNIS XXVII. SINE VLLA QVÆRELA. This couple must for ever throw in the shade all the candidates for the Dunsow fitch!

§ 3.

COMMEMORATIVE INSCRIPTIONS.

THE inscriptions of this class discovered in Britain are chiefly records of the construction of the renowned Roman wall, the work of the legions quartered in the province. Sometimes they are of the simplest character, as LEG. VI. VI. F *Legio sexta victrix fecit*. One has the legend LEG. II. AVG. FEC. in four lines within a garland. Others mention the names and titles of the Emperors, with the length of the work executed by the legion. Of these, the two following are examples.

Augusta

Fecit passus ter mille ducentos septuaginta unum.²

Legionary inscriptions also occur on tiles, which, it thus appears, were manufactured by soldiers quartered in particular places. At York vast numbers are found stamped by the sixth and ninth legions, and have been described by Mr. Wellbeloved.³ Rarely the name of the place is added, as on tiles found in London, in Mr. C. R. Smith's collection, PR. BR. LOND., which may be rendered *Prima cohors Britonum Londinii*.

² Horsley, *Britannia Romana*, p. 192, No. 2.

³ Eburacum, or York under the Romans. 8.vo.

§ 4.

DEDICATORY INSCRIPTIONS.

OF these, examples will be found in Horsley and Camden. They are chiefly inscribed to divinities, or to the deified emperors. There is one by the sixth legion, to the Genius of the Roman people, who is so often seen represented on the coins of Constantius Chlorus and his successors :—

LEG. VI.

VIC. PF

G. P. RF

—

Legio sexta
 Victrix pia fidelis
 Genio populi Romani fecit.

Another, probably of a later period, is dedicated to the Victory of the emperors.

VICTORIAE

AVGG

D. D.

N. N.

—

Victoriae
 Augustorum
 Dominorum
 Nostorum.

The last two lines are placed within a laurel garland supported between two figures of Victory; a device and inscription frequently seen on the very common coins of the age of Constantine and his successors.

A stone found at Silchester in 1741, bears an inscription to Julia Domna, the wife of Severus, in which she is designated Mother of the Senate and the Camp, as on her coins.

IVLIAE. AVG
MATRI. SE
NATVS. ET.
CASTROR.
M. SABINVS
VICTOR. OB.

Juliae Augustae
Matri Senatus
et Castrorum
M. Sabinus

Victorinus ob (honorem posuit).

Another found at the same place in 1732, bears,

HONO.

Deo Herculi
Sagontiacorum
Titus Tammonius
Saenii Tammonii
Vitalis (filius)
(ob) hono(rem).

§ 5.

ALTARS.

THE votive altars to various divinities by the Roman troops stationed in Britain, are among the most interesting and important monuments of this period, and in some instances verify the recital of the historian. Thus the well-known passage in Tacitus, in which he speaks of the effective service of the Batavian and Tungrian cohorts,¹ receives confirmation from the inscription on a votive altar to Mars, by the first Tungrian cohort, discovered at Housteads in Northumberland.

DEO
MARTI QVIN.

Deo
Marti Quintus
Florius Ma
ternus Præfectus
Cohortium Tungriorum
Votum solvens libens merito.

¹ Vita Agricolaë, c. 36.

² See plate viii. No. 5.

Several other altars dedicated by this cohort have been found in England. Three of them are preserved in the museum of the Society of Antiquaries of Newcastle upon Tyne, where there is also a stone inscribed, COHORS. I. BATAVORVM. A perfect inscription on an altar to Fortune raised by the same cohort is, however, given by Camden.³

FORTVNAE
COH. I. BATAVOR.
CVI PRAEEST
MALACCIVS
MARCELLVS PRE.

A representation of this altar, preserved in the Museum of the Society of Antiquaries of Newcastle-upon-Tyne, is given in Horsley.

An altar, dedicated jointly to Juno and Minerva by the third cohort, is particularly interesting, from the circumstance of its bearing a date, namely, that of the year of Rome, 964, (A.D. 212), the last of the reign of Severus, when L. F. Ruffus Lollianus Gentianus and Pomponius Bassus were consuls:—

³ Britannia, vol. iii. pl. xix. The Batavian cohort was probably a long time located in Britain. Dr. Leemans informs us, that there are no military remains in their own country. Archæologia, vol. xxvii. p. 220. This is in accordance with the Roman policy, which did not deem it safe to occupy a province with the troops raised within it.

These divinities are known to us only by such monuments. An altar with an inscription, commencing DEO ARCIACON was recently discovered at York,⁶ and is supposed to have been dedicated to a local divinity perhaps worshipped at Arciaca in Gaul.

But the most interesting monument of this class is, perhaps, the altar inscribed to the Genius of Britain, found in the last century in Scotland.

⁶ It is engraved in the *Journal of the British Archæological Association*, vol. ii. p. 248. In the same article, will be found a very interesting memoir on the altars inscribed to the DEAE MATRES, of which an example is given in the *Archæologia* vol. vii. pl. xxx. A votive altar to the goddess Bellona, dedicated by a prefect of cavalry of the Augustan wing, has recently been found in Cumberland. *Journal of the British Archæological Association*, vol. iii. p. 43.

⁷ *Archæologia*, vol. iii. p. 119.

§ 6.

AMPHITHEATRES, STATIONS, CAMPS AND
ROADS.

THESE remains in Britain offer no peculiarities which are not observable in the same works in other countries once occupied by the Romans.

Their amphitheatres, for obvious reasons, are circular or semicircular; but in their other works the Romans observed the rectilinear.¹ Their military ways, stretching in a direct line from station to station, and their camps, villas, and temples, formed in squares or parallelograms, are in striking contrast with the tortuous trackways and circular boundaries of the ancient inhabitants of Britain.

Of the few remains of Roman amphitheatres in Britain, that overlooking the town of Banbury is perhaps the most perfect. It is a semicircular

¹ Antiquaries recognise this arrangement, and trace the topography of a part of Roman London, in the principal streets intersecting Cheapside at this day. See the various papers on this subject in the *Archæologia*, noticed in the appendix to this volume.

work, cut in trenches or terraces, in the concave front of a steep hill overlooking the town.² The well-known Roman amphitheatre at Dorchester was recently in danger of being destroyed by railway works in that neighbourhood, but has been saved at the intercession of our English antiquaries. There are still remains of an amphitheatre at Silchester, in Hampshire, but the embankment inclosing the area is planted with trees.³

Among the most perfect examples of Roman castrametation in this country, are those near Llandrindod, described and engraved in the *Archæologia*⁴ by the Rev. Thomas Price of Brecon. Many earthworks of the Celtic period were probably altered and taken possession of both by the Romans and Saxons.⁵

The Roman stations were the permanent posts established at the intersection of their roads in districts subject to incursions. They were fortified with walls; and, from the long location of the

² Beesley's History of Banbury, pl. vii. p. 25.

³ A view of this amphitheatre is given in the *Archæological Album*.

⁴ Vol. xvii. plate xii. page 168.

⁵ The occupation of such sites is, of course, determined by the discovery of remains of particular periods. Coins, fibulæ, and pottery of Roman work disinterred on the spot, are evidence sufficient of its former possession.

legions, became places of importance, and subsequently cities, the Latin *castra* being Saxonised to *ceaster*.

With regard to the Roman roads, or military ways, they are, as before observed, rectilinear, and differ in no respect from those yet traceable in every country at one time in the occupation of that people.⁶

§ 7.

VILLAS.

REMAINS of villas of the Roman-British period have been frequently disclosed during excavations in England, and have been from time to time described, and often engraved in the numerous topographical works with which our literature abounds. Plans and descriptions of more recent explorations, will be found in the Journal of the

⁶ Cf. Horsley, *Britannia Romana*; Bergier, *Histoire des Grands Chemins de l'Empire Romaine*; also Cellarius, and D'Anville.

British Archæological Association,¹ and the Archæological Journal;² but as 'they offer no peculiarities distinguishing them from those discovered in the other Roman provinces, they do not claim more than a general notice here.

§ 8.

POTTERS' KILNS.

AMONG the numerous existing remains of the Romano-British period, are Potters' Kilns, several of which have been explored by Mr. Artis, at Castor, near Peterborough, in the county of Northampton.³ Another was last year discovered by the same gentleman at Sibson, near Wandsford, in that county. "This kiln," Mr. Artis

¹ Vide *inter alia*, remains at Hartlip, Kent, vol. i. p. 314; Bisley, vol. ii. p. 324; near Dursley, *ibid.* p. 349; Maidstone, *ibid.* p. 86; Rivenhall, *ibid.* p. 339; Stanway, in Essex, *ibid.* p. 45.

² Vide the plan of the Roman villa, at Wheatley in Oxfordshire, and that at Bisley, vol. ii. p. 42.

³ The site of the Durobrivis of the fifth British Iter of Antoninus. C. R. Smith in the Journal of the British Archæological Association, vol. i. p. 1—9. E. T. Artis, *ibid.* vol. ii. p. 164—169.

states, "had been used for firing the common blue or slate-coloured pottery, and had been built on part of the site of one of the same kind, and within a yard and a-half of one that had been constructed for firing pottery of a different description. The older exhausted kiln, which occupied part of the site of that under consideration, presented the appearance of very early work; the bricks had evidently been modelled with the hand, and not moulded, and the workmanship was altogether inferior to that of the others, which were also in a very mutilated state; but the character of the work, the bricks, the mouths of the furnaces, and the oval pedestals which supported the floors of the kilns, were all still apparent. The floors had been broken up some time previous to the site being abandoned; and the area had then been used as a receptacle for the accumulated rubbish of other kilns."

He further remarks on the means employed to colour the Roman pottery, "I was led to the conclusion that the blue and slate-coloured vessels met with here in such abundance, were coloured by suffocating the fire of the kiln, at the time when its contents had acquired a degree of heat sufficient to insure uniformity of colour. I had so firmly made up my mind upon the process of manufacturing and firing this peculiar

kind of earthenware, that for some time previous to the recent discovery, I had denominated the kilns, in which it had been fired, smother-kilns. The mode of manufacturing the bricks of which these kilns are made is worthy of notice. The clay was previously mixed with about one-third of rye in the chaff, which being consumed by the fire, left cavities in the room of the grains. This might have been intended to modify expansion and contraction, as well as to assist the gradual distribution of the colouring vapour. The mouth of the furnace and top of the kiln were no doubt stopped: thus we find every part of the kiln, from the inside wall to the earth on the outside, and every part of the clay wrappers of the dome, penetrated with the colouring exhalation. As further proof that the colour of the ware was imparted by firing, I collected the clays from the neighbourhood, including specimens from the immediate vicinity of the smother-kilns. In colour, some of these clays resembled the ware after firing, and some were darker. I submitted them to a process similar to that I have described. The clays dug near the kilns whitened in firing, probably from being bituminous. I also put some fragments of the blue pottery into the kiln: they came out precisely of the same colour as the clay fired with them, which had been taken from the site of the kilns.

The experiment proved to me, that the colour could not be attributed to any metallic oxide, either existing in the clay or applied externally; and this conclusion is confirmed by the appearance of the clay wrappers of the dome of the kiln. It should be remarked, that this colour is so volatile, that it is expelled by a second firing in an open kiln.

“I have now traced these potteries to an extent upwards of twenty miles. They are principally confined to the gravel beds on the banks of the Nen and its tributary streams; the clay used at some of them appears to have been collected at some little distance from the works.

“The kilns are all constructed on the same principle. A circular hole was dug, from three to four feet deep, and four in diameter, and walled round to the height of two feet. A furnace, one-third of the diameter of the kiln in length, communicated with the side. In the centre of the circle so formed was an oval pedestal, the height of the sides, with the end pointing to the furnace mouth. Upon this pedestal and side wall, the floor of the kiln rests. It is formed of perforated angular bricks, meeting at one point in the centre. The furnace is arched with bricks moulded for the purpose. The side of the kiln is constructed with curved bricks set edgeways in a thick *slip* of the same material to the height of two feet.

“I now proceed to describe the process of packing the kiln, and securing uniform heat in firing the ware, which was the same in the two different kinds of kilns. They were first carefully loose-packed with the articles to be fired, up to the height of the side walls. The circumference of the bulk was then gradually diminished, and finished in the shape of a dome. As this arrangement progressed, an attendant seems to have followed the packer, and thinly covered a layer of pots with coarse hay or grass. He then took some thin clay, the size of his hand, and laid it flat on the grass upon the vessels; he then placed more grass on the edge of the clay just laid on, and then more clay; and so on until he had completed the circle. By this time, the packer would have raised another tier of pots, the plasterer following as before, hanging the grass over the top edge of the last layer of plasters, until he had reached the top, in which a small aperture was left, and the clay nipt round the edge: another coating would be laid on as before described. Gravel or loam was then thrown up against the side wall, where the clay wrappers were commenced, probably to secure the bricks and the clay coating. The kiln was then fired with wood. In consequence of the care taken to place grass between the edges of the wrappers, they could be unpacked in the same

sized pieces as when laid on in a plastic state; and thus the danger in breaking the coat to obtain the contents of the kiln could be obviated."

Examples of the earthenware of these potteries will be found in the plates of vases, etc., of the Roman British period; but these, it should be distinctly understood, are not altogether peculiar to Britain; and the accounts here quoted are interesting, merely as shewing that much of the Roman pottery discovered in this country was actually fabricated within the province of Britain.

§ 9.

POTTERS' STAMPS.

THE Roman Pottery, especially the glazed red ware, is often stamped with the name of the maker. The letters are sometimes braced together, or put one within the other, as in the abbreviation of the word OFFICINA, where the F is placed within the o. The establishment of potteries in Britain is proved by the excavations of

Mr. Artis, before noticed;¹ and these lists of names may assist further enquiry. The following are from fragments of Pottery discovered in London, in the collection of Mr. C. R. Smith, and were communicated by him to the *Archæologia*.²

TESSELATED PAVEMENTS.

MANY remains of these pavements are described and engraved in the *Archæologia*, and in our various topographical and country histories. One of the most interesting, is that preserved almost entire at Barton farm, in the park of Lord Bathurst, at Cirencester. The subject is the myth of Orpheus taming the brutes with his Lyre. Another at Woodchester, in the same

⁶ Senici officini.

county, is in excellent preservation, and has been engraved by Lysons. At Watlington, in Oxfordshire, is another of very elegant design, and at Beaconsfield farm, in the same county, is a fragment of a fine specimen of this beautiful art. These two latter are engraved by Mr. Beesley, in his history of Oxfordshire.¹

§ 11.

WALLS.

SEVERAL fragments of Roman walls yet exist in England, exhibiting very decided examples of their peculiar masonry. Among these may be noticed the remains at Richborough, the "Jewry wall," at Leicester, the gates and walls at Lincoln and Colchester, and various fragments at Silchester. Views of these will be found in our various county histories, and in the *Archæologia*, and also in the recent publications of the *Archæological Association* and the *Archæological Institute*.

¹ Plates x. xi. An example of a very perfect tessellated pavement, discovered at Basildon, in Berkshire, is given in Mr. Smith's *Collectanea Antiqua*, plate xxiv.

§ 12.

MILLIARIA OR MILE-STONES.

EXAMPLES of the Roman *milliarii lapides*, or mile-stones, are found in nearly every province of the empire. The Roman mile consisted of one thousand paces (*passus* not *gradus* as some have written) of five feet each. A mile therefore contained five thousand feet, or about one hundred and forty yards less than ours.¹ The initials M.P. (*mille passuum*) generally stand for mile on these stones. Augustus erected a gilt pillar (*milliarium aureum*) in the Forum at Rome, where the principal roads terminated, though the miles were not reckoned from it but from the gates of the city. Our *London Stone* is supposed to be the relic of one of these central pillars, which appear to have been set up in the chief cities of the Roman Empire.

The examples of milliary columns in England have suffered by time and neglect, and con-

¹ The Roman mile contained eight Greek stadia.

sequently are in a mutilated and defaced condition, the inscriptions being, in some instances, nearly obliterated. One of the best preserved is in the Museum of the Literary and Philosophical Society at Leicester. It was dug up in the year 1771, on the side of the foss-way about two miles from that town. It is of a cylindrical form resting on a quadrangular base. The inscription, which was formerly decyphered as follows, is extremely interesting as identifying Leicester with the Roman *Ratae*.²

§ 14.

COINS.

ROMAN COINS are found in great numbers in every part of Britain, and in many parts of Ireland. The most numerous are those of the Lower Empire, from Gallienus down to the reign of Arcadius and Honorius. Even the money of usurpers, who reigned in Gaul only, is very frequently discovered in districts remote from the coast. Many barbarous brass pieces, of very small size, and of the rudest execution, appear to have formed a part of the currency of this island; whether of authorised issue or the product of illegal mints cannot be determined, though their style and illegible legends led to the latter conclusion.

But the coins which deserve especial notice, and which belong to this period, and to Britain exclusively, are those of Carausius and Allectus, and the small brass of Maximian, Diocletian, and the family of Constantine, with P. LON. in the exergue.¹ It is needless to insist on the great

¹ These coins, undoubtedly struck in London, are described and engraved in my work entitled "Coins of the Romans relating to Britain," 8vo. London, 1844.

importance of the study of coins in connexion with our national antiquities, or to observe that they often supply chronological data obtainable from no other source.

§ 15.

ROMAN COIN MOULDS.

THE debasement of the coin by Severus, afforded facilities to the forger; and the money of this period is often found to be cast, and not struck from a die, as was the practice in the Roman mints in the better times of the Empire. Utensils for the manufacture of this spurious currency have been discovered in France and in England; and the experiments of my friend, the Rev. J. B. Reade, have demonstrated that these moulds were, in this country, made on the spot where they were discovered; but, whether the pieces thus fabricated were issued by imperial authority, or were the clandestine performances of forgers, is still a matter of doubt and uncertainty.¹

¹ See on this subject "Coins of the Romans relating to Britain," pp. 69—102, and plate vii., in which are represented the apparatus used in casting these coins. Also an article "On the Forgeries of the Public Money," *Numismatic Chronicle*, vol. vi. p. 57.

§ 16.

MISCELLANEOUS REMAINS OF THE ROMAN-BRITISH PERIOD.

PLATE VIII.

- Fig. 1 Is a perspective view of the Roman Tumuli, called "The Bartlow Hills," at Ashdon, in Essex. The height of the largest tumulus is forty-five feet, the diameter one hundred and forty-seven feet. The diameter of the three other principal hills is about one hundred feet, and the diameter of the three smallest, ninety-five feet.
- 2 The interior of the sepulchre or bustum, within the larger tumulus, formed of wood, and containing
1. a folding-stool.
 2. A pair of strigils.
 3. The large glass vessel represented in our pl.viii. fig.9.
 4. A bronze patera, with a reeded handle terminating in a ram's head.
 5. A bronze dish.
 6. A bronze lamp.
 7. A most beautiful bronze enamelled vessel, shaped like a glue-pot (engraved in our pl.ix. fig.11).
- Without the line of the chest stood a large amphora, height $22\frac{1}{2}$ inches, filled with earth, ashes, and fragments of small bones.
- 3 The sepulchral slab discovered at Watermore, near Cirencester, and described *ante*, § 2, p.67.
- 4 Another slab from the same locality, described *ante*, p. 69.

- Fig. 5 The altar found at Housteads. (*Ante*, § 5, p.77.)
- 6 Tiled tomb found at York. (*Ante*, § 1, p. 65.)
- 7 Closed brick vault, discovered in one (the centre) of the smaller Barrows called the Bartlow Hills, six feet three inches long, two feet three inches and a half wide throughout, and one foot eleven inches and three quarters high, standing north and south on a bed of chalk, about a foot below the natural surface.

PLATE IX.

- Fig. 1 The vault fig. 7. in the previous plate, with the covering removed and shewing its contents; namely, the glass vessel fig. 8. in this plate; another glass vessel of the same character, but much smaller, containing some dark-coloured fluid, and a bucket-shaped vessel of wood with a handle at the side, engraved in our pl. xii. fig. 8.
- 2 The Tomb and its contents, discovered at Avisford in Sussex. *Ante*, § 1, p. 65.
- 3 Leaden coffin (*Ante*, § 1, p. 65), discovered on the site, of a Roman and Anglo-Saxon cemetery, near Colchester. The style of ornament might lead to the inference that it is of a much later period; but *Dr. Smith* cites some well authenticated accounts of discoveries of similar sarcophagi, which leave no doubt of the origin of this example. *Journal of the British Archæological Association*, vol. ii. p. 297.¹

¹ A coffin of this description, found in the Kent Road, Southwark, is engraved in the xvii. vol. of the *Archæologia*, pl. 25. It has two figures of Minerva on the lid.

- Fig. 4 Vessel of greenish coloured glass, taken from the smaller tumuli called the Bartlow Hills.
- 5 Glass vessel of the same character, containing fluid; from the larger Bartlow tumulus.
 - 6 Another glass vessel from the same tumulus.
 - 7 Another glass vessel from one of the lesser Barrows. *Archæologia*, vol. xxv. pl. 3.
 - 8 Large urn of greenish coloured glass, discovered in the brick vault, represented in our pl. ix. fig. 1. height $11\frac{1}{2}$ inches, diameter $10\frac{1}{2}$ inches.²
 - 9 Glass vessel of a greenish colour, filled to the brim with burnt bones. Height $15\frac{1}{2}$ inches, diameter $7\frac{1}{4}$ inches. From the larger Bartlow tumulus.
 - 10 Glass vessel of the same manufacture as the others in this plate.
 - 11 Bronze vessel, with a rectangular handle, having an indentation within the lip for the support of some instrument. Height $3\frac{3}{4}$ inches, diameter of the body, $4\frac{3}{4}$ inches. It is very elegantly enamelled throughout in green, red, and blue.³ A fac-simile representation of this very beautiful object is given in the *Archæologia*, vol. xxvi.
 - 12 The potter's kiln, discovered by Mr. Artis, at Sibson, near Warnford, in Northamptonshire. (*Ante* § 1.)

² This vessel was open at the mouth, and nearly two-thirds full of a clear pale yellow liquor, covering a deposit of burnt bones, on the top of which was lying a gold ring set with a carnelion, on which were engraved two ears of corn. Among the bones was found a second brass coin of Hadrian.

³ Mr. Gage did not appear to be aware that this description of enamelling was practised, though often rudely, yet very commonly, in Britain or Gaul, before the Romans abandoned this island. I would refer to the circular fibulæ, and other

PLATE X.

GLASS VESSELS AND URNS OF EARTHENWARE.

- Fig. 1 Glass bottle of the kind called Lachrymatories found at Colchester. *Journal of British Archæological Association*, vol. i. p. 239.
- 2 Glass bottle from one of the Bartlow Tumuli: height $5\frac{1}{4}$ in. *Archæologia*, xxvi. pl. 33. fig. 4.
- 3 Glass bottle sealed, and containing fluid: height $7\frac{1}{2}$ in. *Ibid.* fig. 4.
- 4 Glass vase, from one of the Bartlow Barrows: height $10\frac{3}{4}$ in., diam. $5\frac{1}{2}$ in. *Archæologia*, xxv. pl. 2. fig. 1.
- 5 Glass bottle found at Shefford, Bedfordshire. *Journal of British Archæological Association*, vol. i. p. 52.
- 6 Fragment of a glass vase from the Ustrinum at Litlington. *Archæologia*, xxvi. pl. 45. fig. 8.
- 7 Glass cup, found in one of the Bartlow Tumuli. *Archæologia*, vol. xxix. pl. 1, fig. 6.
- 8 Vase of green glass found in the Ustrinum at Litlington. *Archæologia*, vol. xxvi. p. 45. fig. 7.
- 9 Vase of light green glass: height 9 in., circumference 5 in.; found in Bourne Park, near Canterbury.

personal ornaments, on which we find specimens of blue and apple-green enamel, two colours prevailing on this vessel. The often-quoted passage in Pliny, lib. xxxiv. c. 48, shews that the Gauls were, in the time of that writer, very skilful in the art of plating and the ornamenting of horse-trappings. The passage in Philostratus, quoted by Mr. Gage, shews clearly that enamelling is not of classic origin, and almost points to Britain. The fibulæ referred to are different from those of the Anglo-Saxon period, so frequently discovered in Tumuli, and evidently belong to the last century of the Roman occupation. See examples in our plate xii. figs. 14 and 17, and fig. 21.

- Fig. 10 to 14 Urns from the Ustrinum at Litlington, of the ordinary forms discovered throughout England.

92 Vase from the same locality. *Ibid.* p. 136.

93 Vase from the same locality. *Ibid.* p. 136.

94 Vase of a peculiar pattern found at Westminster. *Journal of British Archæological Association*, vol. ii. p. 102.

- Fig. 95 Vase from the neighbourhood of the Kilns, at Sibson. *Journal of British Archæological Association*, vol. i. p. 3.
- 96 Vase from Breden, in Flanders: height $5\frac{1}{2}$ in., diameter 5 in. *Ibid.* p. 8.
- 97 Elegant little cup of earthenware found in Norfolk. *Archæological Journal*, vol. i. p. 381.
- 98 Vase found at Upchurch. *Journal of British Archæological Association*, vol. ii. p. 136.
- 99 Vase from the same locality.
- 100 to 101 Vases of the description termed Samian, found in London, and in the collection of Mr. Charles Roach Smith: height 5 in., diameter 9 in. *Journal of British Archæological Association*, vol. i. p. 313.
- 102 Vase of reddish-brown pottery, with a white scroll: height 7 in., circumference 5 in.; found with No. 9. pl. x.
- 103 to 104 Pateræ of the common forms, found throughout England.
- 105 Thuribulum, or censer, from the Ustrinum at Litlington. *Archæologia*, vol. xxvi. pl. 45. fig. 30.
- 106 to 115 Pateræ, etc., from the Ustrinum at Litlington and other localities in England.

PLATE XII.

BRONZE VASES, PATERÆ, LAMPS, FIBULÆ OF BRONZE, STYLI, ETC.

- Fig. 1 Bronze vessel resembling a distiller's can, from one of the Bartlow Tumuli. *Archæologia* xxvi. pl. 33. fig. 3.
- 2 Bronze præfericulum, from one of the Bartlow Tumuli: height 10 in. *Archæologia* xxvi. pl. 33.

Fig. 3 A bronze patera, with a handle terminating in a ram's head. In this vessel lay the præfericulum, fig. 2, as here represented. See pl. viii. fig. 2., shewing the disposition of the various objects.

4 and 5 Bronze pateræ and vases from the Bartlow Tumuli. *Archæologia*, vols. xxv. and xxvi.

6 Elegant bronze lamp discovered in one of the Bartlow Tumuli. See our pl. viii. fig. 2.

7 Small glass cup, from one of the Bartlow Tumuli. *Archæologia*, vol. xxv. pl. 3. fig. 8.

8 Wooden vessel, with bronze hoops and handle: height $4\frac{1}{2}$ in., diameter 2 in.; from one of the Bartlow Tumuli. *Archæologia*, vol. xxv. p. 8.

9 and 10 Bronze Fibulæ found at Kirkby Thore, in Westmoreland, and described by Capt. W. Henry Smyth, R.N., in the *Archæologia*, vol. xxxi. p. 279. No. 10. has a Celto-Roman appearance, and is probably of native workmanship.

11 to 14 Fibulæ discovered in the neighbourhood of Devizes, North Wilts. No. 14. is ornamented with a lozenge of blue enamel, like the stylus, No. 21.

15 Fibula found at Bydews, near Maidstone. *Journal of British Archæological Association*, vol. ii. p. 75.

16 Fibula of gold found at Odiham, in Hampshire, and now in the British Museum (one third of the size of original). *Archæological Journal*, vol. ii. p. 46.⁴

⁴ Cf. Caylus, *Rec. d'Antiquités*, tom. i. pl. 94. fig. 8. The cruciform design of this fibula, and its differing from all those found in Anglo-Saxon Tumuli, warrant our assigning it to a late period of the Roman possession. "Although, in poetic descriptions, golden fibulæ are mentioned at the best period of the history of Rome, some restriction appears to have directed

- Fig. 17 Circular fibula found near Devizes, coarsely enamelled in blue, green, and white.⁵
- 18 Bronze stylus, in the collection of Mr. C. R. Smith, found in London.
- 19 Bronze stylus (?) found in London, in the collection of Mr. C. R. Smith.
- 20 Bronze stylus found in the same locality as Nos. 9 and 10.
- 21 Stylus (?) found at Lancing, in Sussex. *Journal of British Archæological Association*, vol. i. p. 149.

their use. At the period of the civil war (Plin. xxxiii. 12.) Brutus reproaches his military tribunes with using these ornaments, thereby indirectly implying that fibulæ of this precious metal were considered as tokens of effeminacy. They appear, however, to have been bestowed on the Equites, as a reward for valour (Liv. xxxix. 31); and they were probably, at an early period, the decorations of females, their use being derived from the more refined and artistic Etruscans. The early fibulæ were of bronze, and the military generally were restricted to the wearing of silver, gold fibulæ being only allowed to the Tribunes. Valerian commanded Zosimio, the procurator of Syria, to present to Claudius II., when military tribune, two fibulæ of silver gilded, and one of gold, as an extra donative (Hist. Aug. Script. Pollio, vit. Claudii); and Aurelian conceded to the common soldier the permission to wear gold fibulæ (ibid. Vopiscus. vit. Aurel. c. 46)." S. Birch, in *Archæological Journal*, vol. ii. p. 47.

⁵ This resembles the example given by Mr. C. R. Smith in his *Collectanea*, pl. xxvi. and justifies the remarks, made *ante*, p. 109. Cf. *Delineations of Roman Antiquities*, found at Caerleon; by J. E. Lee. 4to London, 1845, pl. xv. figs. 5, 6, 8.

PLATE XIII.

STYLI, SPATULÆ, MIRRORS, BRACELETS, ETC.

- Fig. 1 to 15 Styli, Spatulæ, and other implements, found during excavations in various localities in London, preserved in the collection of Mr. C. R. Smith.
- 16 Bronze wand or sceptre found at Castor in Northamptonshire. *Journal of British Archæological Association*, vol. ii. p. 103.
- 17 Bronze box containing a speculum.⁶ *Archæologia*, vol. xxvii. pl. 25.
- 18 Bronze lamp found in one of the lesser Bartlow Tumuli. *Archæologia*, vol. xxv. pl. 2. fig. 10.
- 19 The gold ring found in the glass vase, pl. ix. fig. 8.
- 20 One of the strigils found in the Bartlow Tumulus, pl. viii. fig. 2.
- 21 Bracelets of mixed metal found in an urn with coins of Antoninus Pius, etc., at Castlethorpe in Buckinghamshire. *Journal of British Archæological Association*, vol. ii. p. 353.
- 22 Bronze bracelets found at Colchester. *Journal of British Archæological Association*, vol. ii. p. 101.
- 23 Bronze Armilla found at Colchester. *Ibid.*
- 24 Massive bracelet of bell metal, said to have been found in a tumulus near Brighton. *Ibid.* vol. i. p. 148.
- 25 Bronze Armilla, found with a skeleton at Ventnor, Isle of Wight, in 1845.

⁶ The box has the head of Nero, with the *adlocutio* type, and is evidently imitated from a large brass coin of the period. This object was found with a cinerary urn in the parish of Coddensham in Suffolk, in 1823. For notices of Roman Mirrors, see Montfaucon, *Antiq. Supp.* tome iii. pl. 21; and Caylus, *Rec. d'Antiquités*, tome iii. p. 331, and tome v. p. 174.

ROMAN SILVER PLATE DISCOVERED NEAR
NEWCASTLE.

AMONG the Roman remains discovered in Britain, is the remarkable object represented in the accompanying plate. It is shaped like a modern tea-board, weighs 148 ounces, and is about twenty inches long, by fifteen broad. It was found in a boggy place near Newcastle, by some children at play, and by them taken to a smith's shop; the smith sold it to a goldsmith in the town, and it finally became the property of the Duke of Northumberland. Without attempting a description of the subject represented on this plate, we may observe, that the first three female figures clearly represent Diana, Minerva, and Juno, and the fourth, perhaps, Security;¹ and

¹ The column surmounted by a globe near this figure, will remind the antiquary of the manner in which *Security* is so often represented on Roman coins, and may, probably, suggest a better interpretation than has yet been offered of the whole group, which if intended to be symbolical of events in Britain, may typify the security of the province in a state of peace. Such an explanation is suggested by the figure of Security, who alone is seated, while the other divinities stand.

that the male figure standing beneath the portico is Apollo, the griffin below being one of the attributes of that divinity. We leave it, however, to the study of more competent judges than ourselves, and refer those who would learn what has been said of this very perfect example of Roman art, to the explanations of Gale, Horsley, and Hodgson.

Enamelled brooch found at Kirkby Thore, with figs. 9, 10, pl. xii.

PIGS OF LEAD.

SEVERAL pigs of lead, inscribed with the names and titles of Roman Emperors, are preserved in the British Museum. They have been found in various parts of England, and shew that this metal was much valued, and used by the Romans or Romanised Britons. An example found at Bossington, Hants, with the name of Nero, has recently been exhibited at a meeting of the British Archæological Association.¹

¹ Journal of British Archæological Association, vol. i. p. 326. and p. 335. Cf. also, Archæologia, vol. xxii., p. 421, and vol. xxiii. p. 369.

PART III.

ANGLO-SAXON PERIOD.

§ 1.

TUMULI.

ON the downs and other high and waste lands in various parts of England, but more especially in the eastern parts of Kent, are found extensive groups of small cone-shaped Barrows or Tumuli.

These Tumuli belong indubitably to the Anglo-Saxon period. Vast numbers of them were explored about sixty years since by the Rev. J. Douglas, an acute and sensible antiquary, who published the result of his investigations in a work illustrated by engravings executed by himself, and remarkable for their fidelity.¹

Although it is probable that many of these Barrows have been abridged of their height by time or accident, they are, on the whole, very inferior in size to those of the Celtic period. In these groups, the least elevated Barrows contain the female subject (or children), as may be inferred by the discovery of beads, trinkets, and other objects of feminine ornament; while the

¹ *Nenia Britannica*; or, a Sepulchral History of Great Britain, from the Earliest Period to its General Conversion to Christianity. By the Rev. James Douglas, F.S.A. Folio, London, MDCCXCIII.

larger mounds generally cover cists containing the head of a spear,² the boss or umbo of a shield, which appears to have been uniformly laid on the lap of the deceased, a sword on the left side, and a knife on the right, of the skeleton, and sometimes an urn or small earthen bottle at the feet.³ The disposition of the last mentioned objects is shown in our plate xiv. fig. 2.

The circumference of the smallest Barrows is about thirteen or fourteen feet; that of the largest thirty-three to thirty-five feet; and they are generally surrounded by a shallow trench. The cists in which the bodies are deposited, usually vary in depth from one to six feet. Douglas states that he found some which exceeded ten feet.

More recent excavations on the downs beyond Canterbury, under the direction of Lord Albert Conyngham, have added a few new objects to those already discovered, proving incontestably that these Barrows are not the burial places of the slain, but the sepulchres of a people in quiet

² In the Barrows of male persons who were doubtless of humbler rank, the knife alone is found.

³ The spear appears to have been laid by the right side of the deceased; and, unless the staff was broken for the purpose of depositing it in the cist, it must have been of about the height of its owner. It is worthy of remark that these weapons are not barbed like some of those which we see in the illuminations of Anglo-Saxon Manuscripts.

possession of the country.⁴ "Their situation," observes Douglas, "near villages of Saxon names, their numbers proportioned to a small clan of people existing at a peculiar era, afford the critical evidence of their owners. They are scattered all over Britain, in places which the Saxons occupied, and are not discovered in the parts of Wales which they had not subdued. The relics, compared with those discovered in the urns found at Walsingham, in Norfolk, the subject of the beautiful old treatise on urn-burial by Dr. Browne, shew the identity of people, and evince the funeral customs of the Saxons, on their visiting this country, to be that of burning, as well as interring the dead."

Those who have been engaged in researches of this description will testify to the accuracy of these remarks, but some will be disposed to question the propriety of the inference which the author draws, when he states his opinion that the Saxons extirpated the Britons from the parts which they then occupied. That the Romanised Britons were entirely subdued by the Saxons is

⁴ These Barrows had remained undisturbed since the opening of some of them by the Rev. James Douglas. On a visit to the spot in the autumn of 1841, I suggested to Lord Albert Conyngham the opening of those which had not been explored, and had the gratification of assisting his Lordship in the opening of about sixty Barrows.

evident, but the total annihilation of the people formerly in possession of the country by their invaders, is not proved by these relics, some of which, but more particularly the urns, which are occasionally found in these graves, remind us of the pottery of the Roman British period.

These Tumuli, then, date from the period of the arrival of the Saxons in Britain, to the middle of the eighth century, when Christian sepulture was admitted within the walls of towns and monasteries,⁵ and the Pagan mode of interment was abandoned. The practice may have been continued a little later in some parts of England, for the words of the edict of Charlemagne,⁶ appear to shew that in France there still lingered a fondness for the earlier mode of burial. A coin of Burgred, who reigned till A. D. 874, was

⁵ It would appear by the Anglo-Saxon laws, that as soon as this new mode of interment was followed, the gross impropriety of burial within the walls of the church itself ensued, in the vain desire that the corpse should rest in the most sanctified spot. The *canons of Eadgar* shew that this evil had increased; for they declare, that no man shall be buried within a church, unless he is known to have led a holy life. The *Ecclesiastical Institutes* interdict the practice, which is stated to be an old one in these lands (*hit pær ealb peap on þýrrum landum*). *Ancient Laws and Institutes of England*, edited by Thorpe, vol. ii. pp. 250 and 408.

⁶ *Jubemus ut corpora Christianorum Saxonum, ad cœmeteria ecclesiæ deferantur, et non ad tumulos Paganorum.* Ap. Paluz. T. J. p. 254, conf. capit. 6; cited by Douglas, *Nenia Brit.* p. 126.

found in Cornwall, in a tumulus containing Anglo-Saxon relics;⁷ and it is not altogether improbable, that at this period in that remote part of the island, Paganism was barely extinct.⁸ The fondness of the people of all countries for ancient usages, need not be illustrated here. It will be sufficient to cite the thirty-fifth canon of Ælfric, in which the priests, when attending the corpse, are enjoined to forbid the heathen songs of the laymen, etc., "lest they be imitators of the *heathenism* which they there commit."⁹

The discovery of small gold coins of the lower Empire, and of the Merovingian kings, to which loops are affixed for the purpose of their being worn as personal ornaments, is, at the present day, not likely to mislead the inquiring antiquary, who so far from regarding them as contemporary with the remains, will only perceive that the date of the interment must be limited one way, while the ornament itself might have been in use very long after the period of its fabrication.

⁷ Archæologia, vol. ix. p. 8.

⁸ The Anglo-Saxon laws favour this conjecture. The secular laws of Canute forbid heathenism (*hæðenrice*), and the practice of heathen rites, or the inducement to men to practise them. *Anc. Laws and Institutes* ed. by Thorpe, vol. i. p. 379, c. 3 and 5.

⁹ *Forþbeoðe ge þa hæðenam ſangar þæra læwepna manna*, etc.

§ 2.

WORKMANSHIP OF PERSONAL ORNAMENTS OF THE
ANGLO-SAXON PERIOD.

It will be remarked, that many of the relics discovered in Anglo-Saxon Tumuli, differ materially from each other;—that there are fibulæ which though differing in form, are similar in construction to those of the Roman British period, and that those of circular form, probably worn by women only, are of two descriptions, some bearing the figure of the cross, and others being without that symbol. A question has lately arisen among antiquaries as to the country of their fabrication. Some have maintained that they are the work of the Anglo-Saxons, while others have contended for their Byzantine origin; but, unless we can be assured that the goldsmiths of the capital of the Eastern Empire, wrought these fibulæ for export to other countries, we must seek some other city as the place of their manufacture. That city was, in all probability, Paris. These remarks apply particularly to the *buckles* studded with pastes and precious stones, which there is every reason to believe were imported from the continent. Merovingian places

of sepulture have been explored in France; and though some of the relics discovered therein differ from those found in Anglo-Saxon Tumuli, some of the buckles are identically the same.¹⁰

In the year 1828, a quantity of gold coins of the Merovingian series was discovered on Bagshot Heath, together with the clasp of a purse, the workmanship of which resembles very closely that of these later fibulæ and buckles,¹¹ and leaves no doubt that it is of continental manufacture. If these ornaments were the performance of native workmen, we are certainly in want of evidence of the fact, while there are several circumstances to warrant conjecture to the contrary. The Anglo-Saxon coinage, with the single exception of the money of Offa, which is admitted by all numismatic antiquaries to have been executed by foreign artists, is rude; rude in the extreme, when compared with these personal ornaments. Asser, in his life of the Great Alfred, informs us that

¹⁰ Cf. *Le Cabinet de l'Amateur et de l'Antiquaire*, Deuxième Année, p. 350, where a buckle is engraved, closely resembling those found in Anglo-Saxon Tumuli in Kent. Also, *Mittheilungen der Antiquarischen Gesellschaft in Zurich*, 4to. 1841. This volume contains several plates of remains of the same period, which are especially deserving the attention of the English Antiquary, on account of their resemblance to those under notice.

¹¹ *Numismatic Chronicle*, vol. vi. p. 171.

the king brought over cunning artificers in goldsmiths' work. The artificers of this description were in such repute among the Franks that, by their law, the *werh-gild* for a slave who was a good worker in gold, was higher than that of a free person of humble rank.¹² We find nothing of the kind in the Anglo-Saxon laws; and the natural inference is, that the more costly articles of personal ornament were generally imported.

¹² Lex Rip., cited by M. Guizot in his admirable Essays on the history of France.

Fibula from a Barrow at Wingham, Kent.

§ 3.

OBJECTS DISCOVERED IN ANGLO-SAXON TUMULI.

PLATE XIV.

THE view at the head of our plate represents a considerable group of Barrows of the Anglo-Saxon period, on Breach Down, in the immediate vicinity of the village of Barham, six miles east of Canterbury. This spot appears to have been the common burial-place of the village. A portion of the Tumuli within the area were destroyed many years since, on the making of a road which passes along the ridge of the hill; on which occasion many relics were discovered. This group of Barrows had been partially explored both by the Rev. James Douglas and Sir Thomas Mantell, when, in the autumn of 1841, nearly the whole of what remained unexamined were opened by Lord Albert Conyngham.

Fig. 2 Represents the grave of a male subject with the spear head, umbo of shield, knife, sword, etc.; and with an urn at the feet.

GLASS VESSELS.

THE examples of glass drinking vessels discovered in Anglo-Saxon Tumuli, are remarkable. They have not inappropriately been termed "tumblers" by our Antiquaries, having neither stalk nor bottom, so that they could not be placed on the table when filled. Some of them are, in fact, *cups*, and closely resemble those seen in the hands of figures carousing, in the illumination of an MS. in the Cottonian Library¹. These cups, which, when filled, could not be set down, are analogous to those of the Greeks, inscribed ΠΡΟΡΙΝΕ ΜΗ ΚΑΤΘΗΙΣ (*drink and don't set down*).² The latter, however, are rare; but the frequent discovery in Tumuli of these evidences of the vice of hard-drinking, for such they certainly appear to be, furnishes a curious illustration of the habits of our Anglo-Saxon forefathers.

Fig. 3 to 5 Drinking cups of glass, from Barrows in East Kent, opened by Douglas;³ Nos. 3. 4. and 5,

¹ MS. Julius, A. VI. Fac-simile representations of these illustrations are given in Mr. Shaw's *Dresses and Decorations of the Middle Ages*, vol. i.

² A vase of this description occurs in the *Catal. Durand*, p. 295. No. 1006. Cf. Panofka, *Recherches sur les Noms des Vases Grecs*, pl. v. p. 30. and *Musée Blacas*, pl. xvi. 3.

³ A fine specimen found at Clacton, Essex, is in the Museum of Mr. C. R. Smith. Glasses of precisely similar form are found in Derbyshire.

are exactly of the form represented in the illustration of the Anglo-Saxon Calendar above referred to.

- 6 Is ribbed, as if intended to render it less liable to be broken.
- 7 Drinking cup, from a Tumulus opened by Lord Albert Conyngham, on Breach Down; height six inches.
- 8 A singular-shaped cup from a Tumulus opened by Douglas.
- 9 Glass vessel found in East Kent, by Douglas.
- 10 Glass vessel found near Otterham Creek, Kent. Journal of British Archæological Association, vol. ii. p. 347.
- 11 Glass from a Tumulus in East Kent, opened by Douglas. Nenia, pl. xvi. fig. 5.
- 12 Cup of a similar shape to the preceding one, found in a Barrow at Chessell, Isle of Wight. Journal of British Archæological Association, vol. ii. p. 52.
- 13 Cup similar to No. 7, from a Barrow in East Kent.
- 14 Cup found with No. 12.

URNS.

THE urns found in Anglo-Saxon Tumuli, are for the most part peculiar to the period, but some appear to be formed on the Roman model. The example found at the feet of the skeleton in the Tumulus, opened by Douglas, on Chatham Lines, a representaion of which is given in our plate xiii. fig. 33, is of the latter description, and affords another indication of the *Romanised* habits of

the Northern Races. Several of the urns found at Kingston, near Derby, are classed with this period; but some of them may possibly be referred to an earlier date.

- 15 Urn from a Barrow in East Kent.
- 16 From a Barrow on Breach Down, Kent.
- 17 to 20 Urns from the site of a Cemetery at Kingston near Derby. Vide the Rev. J. S. Henslow's communication to the Journal of the British Archæological Association, vol.ii. p.60.⁴
- 21 Small urn from the same locality as the four preceding ones.
- 22 Urn from Chessell in the Isle of Wight.
- 23 to 27 Urns from a Cemetery at Kingston, near Derby. Journal of British Archæological Association, vol.ii. p.62,63.
- 28 to 29 Urns from Barrows in the Isle of Wight. Winchester book of British Archæological Association, plate, figs. 12 and 13, p.151. No. 28 has much the appearance of an urn of the Celtic period.⁵
- 30 to 31 Urns from the same locality as Nos.23 to 27.
- 32 Urn from a Barrow on Breach Downs, opened by Lord Albert Conyngham.
- 33 Another Urn from a Barrow on Breach Downs, opened by Lord Albert Conyngham.
- 34 Urn or rather Bottle, from a Barrow on Chatham Lines, opened by Douglas.

⁴ This gentleman considers them *aboriginal British*; but, though there is no record of weapons found on the spot, this is certainly not tenable, while the Saxon name of the place is strongly against such a supposition.

⁵ The paper illustrating these discoveries is very far from satisfactory, and appears to have been drawn up in haste.

- 35 Urn from the same locality as Nos. 30, 31. *Journal of British Archæological Association*, vol. ii. p. 63.

PLATE XV.

BRONZE DISHES, AND PATERÆ.

It seems not improbable that these bronze dishes belong in reality to the Romano-British period. The workmanship of all, and the classical form of Nos. 4 and 5, of our plate favour this conjecture.

- 1 Bronze dish from a Barrow at Chatham, Douglas, *Nenia Brit.* pl. xii. fig. 4.
- 2 A similar dish from a Barrow at Chatham. *Ibid.* pl. ii. fig. 1.
- 3 Another dish from a Barrow at Chatham. *Ibid.* pl. ii. fig. 3.
- 4 Patera from a Barrow near Marlborough, opened by Sir R. C. Hoare. *Anc. Wilts.* vol. ii. pl. 6.
- 5 Patera of elegant shape from a Tumulus at Wingham, East Kent, opened by Lord Albert Conyngham.

BOXES AND BUCKETS.

THE buckets and boxes sometimes found in Anglo-Saxon interments doubtless belonged to women, as they are generally discovered in those graves in which jewels and personal ornaments have been deposited. The grave opened in Bourne Park¹

¹ *Archæological Journal*, vol. i. p. 255.

contained a bucket, and also weapons; but it probably held both husband and wife. A Barrow opened on Roundway Down contained a bucket, and a *monile* or necklace, precisely similar to that in our pl. xvii. fig. 13.

- 6 Brass box from a Barrow in Kent. *Nenia Brit.* pl. xviii. fig. 1.
- 7 Bucket from a Barrow on Chatham Lines. *Ibid.* pl. xii. fig. 11. Height $7\frac{1}{2}$ in.; diam. 8 in.
- 8 Bucket from a Tumulus near Marlborough, opened by Sir R. C. Hoare. *Anc. Wilts.* vol. ii. pl. vi.

WEAPONS.

THESE consist of the long broad sword before alluded to; a spear generally with a remarkably elongated head or blade, but without barb, as we find them represented in Anglo-Saxon MS.; the knife; the shield, of which the boss or umbo alone exists; and the remains of bows and arrows. In one Barrow an axe-head of iron has been found. Both the sword and spear differ materially from those of the Romans, the former realising the description of Tacitus before noticed, and the latter being formed of *iron* and somewhat clumsily wrought. Several specimens are in the collections of Mr. Rolfe of Sandwich, and Mr. C. R. Smith.

- 9 to 11 Iron knives of the ordinary description, from Barrows in East Kent. They are generally found lying on the right side of male skeletons. Fig. 10. is of a less common shape.

- 12 Small spear-head, from a Barrow on Breach Down.
- 13 Arrow-heads, from Barrows in East Kent.
- 14 Sword blade, of the usual form, found in Barrows in East Kent.
- 15 Spear-head, from a Barrow in Kent.²
- 16 Spear-head, from a Barrow in Kent. Douglas, *Nenia Brit.* pl. iii.
- 17 and 18. Swords of the usual form, from Barrows in East Kent.
- 19 Handle of a sword, found in a Barrow at Gilton, near Ash (drawn on a larger scale to shew the form of the hilt). *Archæologia* xxx. pl. xi. fig. 4.
- 20 Axe head, from a burial-place near Ramsgate. In the collection of Mr. Rolfe.

UMBONES OF SHIELDS.

THESE are generally found lying between the legs, as if the shield had been placed in the lap of the deceased. They are of various forms, as will be seen by the specimen engraved, Nos. 23 and 25 being, perhaps, of most frequent occurrence.

- 21 Umbo, from a Barrow in North Wilts, opened by Sir R. C. Hoare.
- 22 „ From a Barrow at Sittingbourne, Kent. *Archæological Album*, pl. i. fig. 14.
- 23 „ From a burial place at Fairford, Gloucestershire. *Journal of British Archæological Association*, vol. ii. p. 53.

² Some of the spear heads of this period are remarkable for the length of the head of the blade. Those found at Stowting are thus distinguished.

- 24 Umbo, from a Barrow in Breach Down. *Archæologia*
xxx. p. 49.
- 25 „ From a Barrow in Breach Down. *Ibid.*
- 26 „ From a burial place at Fairford, found with
No. 23.
- 27 „ Of very remarkable form, found at Driffield,
Yorkshire. *Journal of British Archæological As-*
sociation, vol. ii. p. 55.

FIBULÆ.

THE Anglo-Saxon Fibulæ are of two very distinct kinds; namely, those of circular form and those resembling examples of the Roman period. The latter may almost be classed with the later Roman fibulæ, but the former are better distinguished. The latest circular fibulæ of the Anglo-Saxons are those which have the ornaments disposed in the form of a cross, but we are not on that account to conclude that the owner was a Christian. The Symbol of our faith was, after the age of Constantine, openly exhibited, and being a common form of ornament would be adopted, and imitated, and worn by persons who were Pagans. Excavations in many Pagan Tumuli lead to this inference; due regard, however, being had to the fact that the Pagan mode of sepulture may possibly have continued for a short time after the introduction of Christianity.

28 and 29. Fibulæ of lead, doubtless of the Pagan Saxon

period, described by Mr. Fairholt, in the *Journal of the British Archæological Association*, vol. ii. p. 309.

- 30 Fibula, found at Chessell, Isle of Wight. Winchester book of British Archæological Association, p. 151.
- 31 Fibula, found at Fairford, Gloucestershire. *Journal of British Archæological Association*, vol. ii. p. 54.

PLATE XVI.

FIBULÆ.

- 1 Bronze Fibula, found on Shalcombe Down, Isle of Wight, half the size of original. Winchester Book of British Archæological Association, p. 151, No. 1. of plate.
- 2 Jewelled Fibula, found in the same locality. *Ibid.* p. 151.
- 3 Fibula, from a Barrow at Chartham, East Kent. *Nenia Brit.* pl. xxi. fig. 9.
- 4 Fibula, from a Barrow on Chatham Lines. *Ibid.* pl. ix. fig. 2.
- 5 Jewelled Fibula, found at Gilton, near Ash, Kent. *Archæologia*, vol. xxx. pl. ii. fig. 2.
- 6 Jewelled Fibula, from a Barrow on Breach Down.
7. Jewelled Fibula, from a Barrow in Kent.
8. Bronze Fibula, from a burial place at Shalcombe Down, Isle of Wight. Winchester Book of British Archæological Association, p. 151.
9. Fibula, from a Barrow at Stowting, Kent, set with red and blue glass. Vide the Rev. F. Wrench's *Description of Antiquities*, found in that parish, 8vo.
10. A beautiful Fibula with a gold rim, set with red and blue stone and glass, found at Sittingbourne, Kent,

and in the possession of the Rev. James Vallance.

The engraving is about half the size of the original.

- 11 Fibula set with coloured pastes; from a Barrow at Chartham. *Nenia Brit.* pl. v. fig. 1.
- 12 Gold shell of a Fibula ploughed up at Sutton, near Woodbridge. *Archæological Album*, p. 206.
- 13 Very large Fibula found in a Barrow at Chatham ($\frac{1}{3}$ the size of original). *Nenia Brit.* pl. x. fig. 7.
- 14 The back of No. 13. shewing the action of the tongue, which is rarely found entire.
- 15 Gold Fibula with bronze rim, set with pastes, from a Barrow excavated by Lord Albert Conyngham at Wingham.
- 16 Fibula found at Gilton in the parish of Ash, Kent. *Archæologia*, vol. xxx. pl. ii. fig. 3.
- 17 Fibula found at Gilton. *Ibid.*
- 18 Fibula found near Colchester. *Journal of British Archæological Association*, vol. ii. p. 42. This example may belong to the Romano-British period.

PLATE XVII.

FIBULÆ.

- 1 Bronze Fibula from a Barrow in Kent. *Nenia Brit.* pl. xv. fig. 5.
- 2 Another bronze Fibula from a Barrow in Kent.
- 3 Fibula found at Badly, Northamptonshire. *Journal of British Archæological Association*, vol. i. p. 61.
- 4 Bronze Fibula originally gilt, found in Yorkshire. About $\frac{1}{3}$ of the size. *Journal of British Archæological Association*, vol. ii. p. 311.
- 5 Bronze Fibula from a burial place on Shalcombe Down, Isle of Wight. *Winchester Book of British Archæological Association*, p. 151.

- 6 Bronze Fibula from a Barrow at Chatham (about $\frac{1}{2}$ size). *Nenia Brit.* pl. iv. fig. 7.
- 7 Another Fibula from a Barrow at Chatham ($\frac{1}{2}$ size). *Ibid.* pl. ii. fig. 3.

BUCKLES.

- 8 Buckle from a Tumulus at Chatham ($\frac{1}{3}$ size). *Nenia Brit. Vig.* p. 53.
- 9 Buckle of bronze gilt, found in a Tumulus on Breach Down by Lord Albert Conyngham.
- 10 An elegant Buckle found at Gilton in the parish of Ash, Kent. *Archæologia*, vol. xxx. pl. ii. fig. 5.

BULLÆ, CROSSES, PENDENT ORNAMENTS, ETC.

- 11 Bulla of gold from a Barrow at Chartham, Kent. ($\frac{2}{3}$ ds of size).³ *Nenia Brit.* pl. xxi. fig. 1.
- 12 Another Bulla from a Barrow at Wingham. *Archæological Album*, pl. iii. fig. 4.
- 13 Bulla of gold set with a ruby, found in a Barrow on Breach Down by Lord Albert Conyngham. *Archæologia*, vol. xxx. p. 47.
- 14 Bulla of gold from a Barrow in Kent, ($\frac{1}{3}$ size). *Nenia Brit.* pl. x. fig. 1.
- 15 Bulla of silver from a Barrow at Sibert's Wold, Kent. *Ibid.* pl. xxi. No. 1. fig. 3.
- 16 Pendent ornament set with coloured glass, found at Sibert's Wold, Kent. ($\frac{1}{3}$ size). *Ibid.* pl. xxi. No. 1. fig. 2.

³ The device on this bulla is supposed by Douglas to be the Knot of Hercules; but the very northern character of the interlaced object suggests a different interpretation.

- 17 Bulla of gold set with a garnet from a Barrow in Kent. ($\frac{2}{3}$ size). Ibid. pl. xxi. No. 1. fig. 6.
- 18 Another from a Barrow in Kent. Ibid. pl. xxi. No. 2. fig. 8.
- 19 Jewelled cross from a Barrow in Kent. ($\frac{1}{2}$ size). Ibid. Vignette, p. 67.
- 20 Another cross from a Barrow in Kent. ($\frac{1}{2}$ size). Ibid. page 67.
- 21 Another from a Barrow in Kent. Ibid.
- 22 Small bronze cross from a Tumulus at Wingham. Archæological Album, pl. iii. fig. 8.
- 23 Fragment from a Barrow at Gilton. Archæologia, vol. xxx.

PLATE XVIII.

PERSONAL ORNAMENTS, UTENSILS, ETC.

- 1 A set of instruments strung on a ring, probably comprising an ear-pick and tooth-pick ($\frac{1}{2}$ size), found near Fairford, Gloucestershire. Journal of British Archæological Association, vol. ii. p. 54.
- 2 Bronze "Fæx-nedl," or hair pin, from a Barrow opened by the Rev. J. P. Bartlett on Breach Down. (about $\frac{1}{3}$ size).⁴ Journal of British Archæological Association, vol. i. p. 317.

⁴ Hair pins of bronze, and of a much simpler form, are often found with female skeletons. A Barrow opened by me near Firle Beacon in Sussex, a few years since, contained nothing beside the body but a mass of long light coloured hair and a pin of bronze of the plainest form, about $2\frac{1}{2}$ inches long. Various specimens may be seen in Douglas.

- 3 Another hair-pin, with a jewelled head, found at Wingham, Kent. Archæological Album, pl.iii. fig. 6.
- 4 Perforated Spoon,⁵ found in a Barrow in East Kent. Nenia Brit. pl. ii. fig. 9.
- 5 and 6. Shears of the usual form, from Barrows in East Kent. Ibid. pl. v. No. 2. figs. 2, 3, 5.
- 7 and 8. Tweezers of the ordinary description, from Barrows in East Kent, the Isle of Wight, etc.
- 9 and 10. Bone pins, probably for the hair, found in Barrows on Breach Downs.
- 11 Linked Jewelled pins (in the manner of the modern article of jewellery called "the Union pin"), from a Barrow near Buxton, Derbyshire. Journal of British Archæological Association, vol. ii. p. 237.
- 12 Linked pins, with chain of Bronze, from a Barrow on Breach Down, Kent.
- 13 Monile or Necklace, found in a Barrow in Derbyshire, by Mr. Bateman. A necklace precisely similar, was found a few years since, with a bucket, on Roundway Down, near Devizes, Wilts.
- 14 to 24. Examples of Beads found by Douglas in various Tumuli in East Kent. Vide Nenia Brit. pls. ii. iv. vi. viii. ix. xxi.

These beads are found of various colours, and are sometimes formed of variegated vitrified pastes. Some are of crystal, others of an elongated form, composed of amethystine quartz and nearly the length of the second joint of the finger.

⁵ This is supposed by Douglas to have been used in magical incantations. His remarks, at considerable length, will be found in illustration of the plate in which this relic is engraved.

The latter seem to be peculiar to this period. A fine series, found in a Barrow on Breach Down by Lord Albert Conyngham, is engraved in the *Archæologia*, vol. xxx. pl. i. fig. 5. Very rude beads of amber are frequently discovered in these graves.⁶

25 Comb, from a Barrow on Chatham Lines. *Nenia Brit.* pl. xviii. fig. 9.⁷

26 Crystal Ball, supposed to have been used for magical purposes;⁸ set, and suspended from two rings;

⁶ Examples of all these beads, drawn to the actual size, will be found in the illustrations of the *Nenia*. A considerable number of beads of various kinds was found in the Breach Down Barrows.

⁷ The reader is referred to a very interesting notice by Mr. T. C. Croker in the *Journal of the British Archæological Association*, vol. ii. p. 328, of discoveries of sepulchral interments at a place called Pier-o-wall in the Orkney Islands. Among these are a singularly shaped fibula and a comb. These relics certainly do not appear to be Saxon, but Danish; and we would suggest to the intelligent author of this notice, that the word *Wall* or *Waal* is pretty good evidence that the locality had its name from the visit of the Danes, and that *Wahl* A.S. a stranger or foreigner, is a better interpretation than the old Norse, *slaughter*, though slaughter and a foreign visit were in those days too often synonymous.

⁸ In the Roman tomb discovered at Avisford (ante p. 73. note 7), a crystal ball was found. These balls are not unfrequently discovered in Anglo-Saxon Tumuli, being sometimes strung on an armlet, and they certainly favour the conjecture of the sagacious author of the *Nenia*. Small spheres formed of precious stones were believed to possess great

found in a Barrow on Chatham Lines. Nenia Brit. pl. iv. fig. 8.

- 27 Silver ear-ring from a Barrow on Breach Down.
- 28 Silver ring, probably from the neighbourhood of Barham Downs, supposed to be Anglo-Saxon from the resemblance of the ornament to the following.
- 29 Ring from a Barrow on Sibert's Wold. Douglas, Nenia Brit. pl. xxii.

PLATE XIX.⁹

- 1 to 3. The face, back and edge of the beautiful relic known as *King Alfred's Jewel*, found in 1693, at Newton Park, some distance north of the site of Athelney Abbey, in Somersetshire, near the junction of the Parret and the Thone.¹⁰ The inscription on the edge, which is bevelled towards the front, is
 † AELFRED MEE HEHT LEVVRLAN.—i.e.
 AELFRED ME ORDERED TO BE WROUGHT. The miniature is formed of enamelled mosaic work, and is

virtue, if worn on the arm. "*Chrisolitus debet perforari et in sinistro brachio suspendi*," says a MS. quoted by Mr. Wright in a paper communicated by him to the Society of Antiquaries, vol. xxx. p. 438. The crystal ball represented in fig. 26. seems to be one of these supposed talismans.

⁹ The objects represented in this plate belong to a period later than that originally intended to be comprised in the series of Pagan Anglo-Saxon remains, but their beauty and interest claim a place for them here.

¹⁰ Shortly after its discovery it came into the possession of Colonel Nathaniel Palmer, of Fairfield, Somersetshire; and in the year 1718, his son Thomas Palmer, Esq., presented it to the Ashmolean Museum, where it is now preserved.

covered and protected by an oval plate of rock crystal. The back consists of a plate of gold, on which is engraved a fleur-de-lys-shaped figure, elaborately ornamented and covering the surface. The relic terminates in the head of a dolphin; from the mouth of which projects a small tube traversed by a gold pin, which must, at one time, have served as rivet securing the wooden stem to which it was fixed.

- 4 Enamelled ring bearing the inscription **ETHELVVLF** R. found near Salisbury, and preserved in the British Museum. *Archæologia*, vol. vii. p. 421.
 - 5 Jewelled ornaments to the mouth of a purse, found with a number of gold coins of the Merovingian period on Bagshot Heath, in the year 1828. The shells and chains are of fine gold; the workmanship of the latter being as neat as that of the famous Trichinopoly chains. The circular compartments are set with garnets, and the squares with coloured pastes, like the fibulæ of this age, a cruciform cavity being left in the centre. (Actual size).
 - 6 The object commonly called "St. Cuthbert's Cross" (though the designation has been questioned), found, with human remains and other relics of the Anglo-Saxon period, in the Cathedral of Durham in 1827. (Actual size).
 - 7 Ring of solid gold found in a meadow at Bosington, near Stockbridge, Hampshire. The legend is **NOMEN EHLLA FIDES IN XPO**, and by the style of the letters and the engraving, it may be considered as an early example of Anglo-Saxon workmanship (actual size). *Journal of the British Archæological Association*, vol. i. p. 341.

Mouth of the River Diva	26 00	58 30
Æstuary Tava	25 00	58 30
Mouth of the River Tinna	24 30	58 45
Æstuary Boderia	22 30	58 45
Mouth of the River Alaunus	21 40	58 30
Mouth of the River Vedra	20 10	58 30
Bay of Dunum	20 15	57 30
Bay of Gabrantuici, with a safe Har- bour	21 00	57 00
Promontory Ocellum	21 15	56 40
Mouth of the River Abus	21 00	56 30
Æstuary Metaris	20 30	55 40
Mouth of the River Garrienum	21 00	55 20
Prominence (Extensio)	21 15	55 05
Mouth of the River Idumania	20 10	55 00
Æstuary Jamissa	20 30	54 30

	Longitude.	Latitude.
After which the Promontory Acan- tium	22 00	54 00

On the North Side (of the Island) are
the Novantæ, under the Peninsula,
which bears the same name with
them, and among them are the
following Towns:—

Leucophibia	19 00	60 20
Retigonium	20 10	60 40

Under (or south from them), are the
Selgovæ, and among them these
Towns:—

Carbantorigum	19 00	59 20
Uxelum	18 30	59 20
Coria	20 00	59 40
Trimontium	19 00	59 00

Eastward of these, and of a more
Northern situation than the fol-
lowing People, are the Damnii,
and their Towns are:—

Colania	20 30	59 10
Vanduara	21 40	60 00
Coria	21 30	59 20
Alauna	22 45	59 20
Lindum	23 00	59 30
Victoria	23 30	59 00

The Gadeni of a more Northern Situ-
ation (that is, than the Otadeni).

	Longitude.	Latitude.
The Otadeni more to the South, among whom are these towns:—		
Curia	20 10	59 00
Bremenium	21 00	58 45

After the Damnii eastward, but more northerly, and inclining to the East from the Promontory Epidium, are the Epidii.

Next to them the Ceronēs.

Then the Carnonacæ.

Next the Careni.

The last and most easterly are the Cornabyi.

From the Lælamnonian Bay to the Æstuary of Varar are the Caledonii.

And North of them the Caledonian wood.

But more to the East than they are the Cantæ.

Next to them the Logi, adjoining to the Cornavii.

And North from the Logi lie the Mertæ.

South from the Caledonii are the Vacomagi, whose towns are these:—

Banatia	24 00	59 30
Tamea	25 00	59 30
Alata Castra	27 15	59 20
Tuesis	26 45	59 10

South from them are the Venicontes
to the West and their town Orrea 24 00 58 45

	Longitude.	Latitude.
To the East the Texali and the town Devana	26 15	59 45
And South from the Selgovæ and the Otadeni, and reaching from sea to sea, are the Brigantes, whose towns are:—		
Epiacum	18 30	58 30
Vinnovium	17 30	58 00
Caturractonium	20 00	58 00
Calatum	19 00	57 30
Isurium	20 00	57 40
Rigodunum	18 00	57 30
Olicana	19 00	57 30
Eboracum	20 00	57 20

LEGIO SEXTA VICTRIX.

Camunlodunum	18 15	57 00
Besides these about the well havened bay are the Parisi, and the town Petuaria	20 40	56 40
South from these and the Brigantes, but the most Western, are situated the Ordovices, among whom are the following towns:—		
Mediolanum	16 45	56 40
Brannogenium	16 00	56 15
More to the East than these are the Cornavii, and their towns Deuana	18 30	55 00

LEGIO VICESIMA VICTRIX.

Viroconium	16 45	55 45
----------------------	-------	-------

	Longitude.	Latitude.
Next to these are the CORITANI and their towns		
Lindum	18 40	55 45
Rage	18 00	55 30
Then the Catyeuchlani, whose towns are:—		
Salenæ	20 10	55 40
Urolanium	19 20	55 30
Next to these are the Simeni; their town is		
Venta	20 30	55 20
And more easterly, beside the Estu- ary Jamensa, are the Trinoantes, whose town is Camudolanum .	21 00	55 00
Again, South from the countries be- fore mentioned, but in the most Western Part are the Dimetæ, among whom are these towns:—		
Luentium	15 45	55 10
Maridunum	15 30	55 40
More easterly than these are the Silyres, whose town is Bullæum .	16 20	55 00
Next them are the Dobuni, and the town Corinium	18 00	54 10
Then the Atrebatii, and the town Nalcua	19 00	54 15
Next to these, and in the most eastern part, are the Cantii, and among them these towns:—		
Londinium	20 00	54 00
Daruenum	21 00	53 40
Rutupiæ	21 45	54 00

	Longitude.	Latitude.
Again, the Regni lie South from the Atrebatii and the Cantii, and the town Neomagus	19 45	53 25
Also the Belgæ lie South from the Dobuni and the towns Ischalis	16 40	53 30
Aquæ calidæ	17 20	53 40
Venta	18 40	53 30
South-west from these are the Duro- triges, and their town Dunium .	18 50	52 05
Next to them, in the most western part, are the Dumnonii, among whom are these towns:—		
Voliba	14 45	52 20
Uxela	15 00	52 45
Tamare	15 00	52 15
Isca	17 30	52 45
LEGIO SECVNDA AVG.	17 30	52 35
The islands adjacent to Albion, near the Promontory Orcas are these.		
The island Ocetis	32 40	60 45
The island Dumna	30 00	61 00
Beyond which are the Orcades, about thirty in number, the mid- dle one of which has degrees .	30 00	61 40
And again beyond these is Thule, the most western part of which has degrees	29 00	63 00
The most eastern	31 40	63 00
The most northern	30 20	63 15
The most southern	30 20	62 40
The middle	30 20	63 00

	Longitude.	Latitude.
Beside the Trinoantes are these Islands:		
The island Toliapis	23 00	54 15
The island Counos	24 00	54 30
South from the Great Haven is the island Vectis, the middle of which has degrees	19 20	52 20

CLASSIFIED INDEX TO PAPERS IN THE
ARCHÆOLOGIA,

VOLS. I. TO XXXI.

PUBLISHED BY THE SOCIETY OF ANTIQUARIES OF LONDON.¹

CELTIC ANTIQUITIES.

VOL. PAGE.

- I. 49. On the first peopling of Britain; by Dr. Haviland.
- I. 84. Description of Wetheral Cells, in Cumberland;
by William Milborne, Esq.
- I. 280. Observations on the Welch castles; by the
Hon. Daines Barrington.
- I. 314. On the Circular Stone Monuments in Scotland;
by Dr. James Garden.
- II. 32. An account of some Antiquities found in Ireland;
by the late Lord Bishop of Meath.
- II. 107. An account of the monument commonly ascribed
to Catigern; by — Colebrooke.

¹ It is necessary to observe that this Index is of such papers only as bear on the subject of the three first periods of our history. The classification will sometimes be found to vary materially from that proposed by the writers. This remark applies particularly to the early volumes, though in some of the later ones the same inaccuracies may occasionally be discovered.

VOL. PAGE.

- II. 118. Observations on Stone Hatchets; by Bishop Littleton.
- II. 124. Observations on Stone Hammers; by the Rev. S. Pegge.
- II. 236. Description of the Sepulchral Monument at New Grange, near Drogheda, county of Meath; by Thomas Pownall.
- II. 353. Druidical remains in the parish of Halifax, discovered and explained by the Rev. John Watson.
- III. 276. Extract of a letter from the Rev. George Low respecting some Barrows in the Island of Orkney.
- III. 278. On the extirpation of the Cornish Language; by the Hon. Daines Barrington.
- III. 303. Description of the Carn Braich y Dinas, on the summit of Pen-maen-mawr, in Caernarvonshire; by Governor Pownall.
- III. 350. Further observations on Pen-maen-mawr; by Governor Pownall.
- III. 355. An account of some Irish Antiquities; by Governor Pownall.
- IV. 110. Observations on Kit's Cotty House, in Kent; by the Rev. Samuel Pegge.
- V. 81. Additional information relative to the Cornish Language; by the Hon. Daines Barrington.
- V. 87. Account of some hitherto undescribed remains of antiquity; by the Rev. J. Watson.
- V. 95. On the Rudston Pyramidal Stone; by the Rev. Samuel Pegge.
- V. 106. Observations on Celts; by the Rev. — Lort.
- V. 216. Description of the Dune of Dornadilla; by the Rev. Alexander Pope.
- V. 243. Account of Ancient Monuments and Fortifi-

VOL. PAGE.

- cations in the Highlands of Scotland; by James Anderson.
- VI. 54. Account of a singular Stone among the rocks at West Hoadley, Sussex; by Thomas Pownall.
- VI. 87. A further description of Ancient Fortifications in the north of Scotland; by James Anderson.
- VI. 100. Observations on the Vitrified Walls in Scotland; by the Hon. Daines Barrington.
- VI. 110. An account of some Druidical Remains on Stanton Moor and Hurtle Moor, in the Peak of Derbyshire; by Hayman Rooke.
- VII. 19. Illustration of some Druidical Remains in the Peak of Derbyshire; by the Rev. S. Pegge.
- VII. 131. On the Lows and Barrows in Derbyshire, by the Rev. S. Pegge.
- VII. 149. On the Dundalk Ship Temple; by Thomas Pownall.
- VII. 164. Observations on Early Irish Antiquities; by Thomas Pownall.
- VII. 175. Further account of Druidical Remains in Derbyshire; by Hayman Rooke.
- VII. 178. Remarks on the preceding account; by — Bray.
- VII. 211. On the Chariots of the Ancient Britons; by the Rev. Samuel Pegge.
- VII. 236. An account of certain remarkable Pits or Caverns in Berkshire; by the Hon. Daines Barrington.
- VII. 269. Letter from Governor Pownall, enclosing letter of — Ledwich, on the Ship Temples of Ireland.
- VII. 303. Dissertation on the Religion of the Ancient Druids; by the Rev. Edward Ledwich.
- VII. 408. Account of some Discoveries at Allington, in Kent.
- VII. 412. Account of a Brass Weapon dug up near Woolwich.

VOL. PAGE.

- VII. 414. Note on Tumuli opened at Yealand, in the county of Lancaster.
- VII. 414. Account of a Granite Celt nine inches long, and, also, of some Urns found near Dumfries.
- VII. 417. Notice of a Celt found near Caernarvon.
- VIII. 58. On the Stanton-Moor Urns and Druidical Temple; by the Rev. Samuel Pegge.
- VIII. 209. Some account of the Brimham rocks in Yorkshire; by Hayman Rooke.
- VIII. 384. Description of the Druid Temple discovered at St. Hilary, in Jersey; by — Molesworth.
- VIII. 386. Description of a Druidical Monument in the island of Jersey; by the Right Hon. H. S. Conway.
- VIII. 429 Notice of a Celtic Interment at Tring, in Hertfordshire.
- VIII. 450. Notice of two Copper Celts found in Montgomeryshire and Flintshire, with a remark that such objects are rarely discovered in Wales.
- IX. 84. Observations on some Brass Celts and other Weapons discovered in Ireland; by the Rev. S. Pegge.
- IX. Discovery of an Urn in Derbyshire; by the Rev. Samuel Pegge.
- IX. 206. Description of some Remains on Harborough Rock, etc., in Derbyshire; by Major Rooke.
- IX. 211. Account of Antiquities in Lancashire; by William Hutchinson.
- IX. 219. Notice of Antiquities in Cumberland and Westmoreland; by Hayman Rooke.
- IX. 367. Urn found near Hazleden, Gloucestershire.
- IX. 378. Bone Weapon found at Danbury in Essex. Celts found near the same place.

VOL. PAGE.

- X. 99. Account of the Ancient Modes of Fortification in Scotland; by Robert Riddell.
- X. 105. Account of Druidical and other British Remains in Cumberland; by Hayman Rooke.
- X. 114. Description of certain Pits in Derbyshire; by Hayman Rooke.
- X. 147. Observations on Vitrified Fortifications in Galloway; by Robert Riddell.
- X. 156. On the Hunting of the Britons and Saxons; by Rev. S. Pegge.
- X. 466. Account of Tumuli in Derbyshire, of a Rocking Stone near Bradfield, and of a Tumulus near Castleton, in Derbyshire and Sheffield, etc.
- X. 478. Antiquities, Celts, etc., found near Dumfries.
- XI. 38. Observations on Kit's Cotty House, in Kent; by William Boys.
- XII. 1. Notice of Antiquities discovered in Derbyshire; by Hayman Rooke.
- XII. 41. Account of Druidical Remains in Derbyshire; by H. Rooke.
- XII. 327. Discoveries in a Barrow in Derbyshire; by H. Rooke.
- XIII. 103. Account of the Fall of some of the Stones of Stonehenge; by W. G. Watson.
- XIII. 204. Account of Flint Weapons discovered at Hoxne, in Suffolk.
- XIII. 404. Account of Urns discovered at Buxton Common, near Norwich.
- XIV. 1. Account of an Urn found at Colney, in Norfolk; by the Rev. W. Gibson.
- XIV. 90. Account of antiquities found at Polden Hill, in Somersetshire; by C. Joseph Harford. These very interesting relics appear to belong to a

VOL. PAGE.

- late period of Celtic history; they are engraved in plates 18—22 of the *Archæologia*.
- XIV. 94. Account of some antiquities discovered on the Quantock hills, in Somersetshire; by Charles Joseph Harford.
- XIV. 224. Account of a Cromlech at Madron, in Cornwall; by the Rev. Malachi Hitchins.
- XV. 118. Account of antiquities discovered in Cornwall; by the Rev. Malachi Hitchins.
- XV. 122. Account of Tumuli opened in Wiltshire; by William Cunnington.
- XV. 338. Further account of Tumuli (British and Saxon), opened in Wiltshire; by William Cunnington.
- XV. 394. Notes on stone Moulds for casting Spear-heads of brass, found in Ireland, with other objects.
- XV. 408. Account of Caves in the county of Armagh, Ireland; with plates.
- XVI. 95. Inquiries respecting the origin of the Inhabitants of the British Islands, by the Rev. Samuel Greathead.
- XVI. 137. Notice of antiquities discovered in Cornwall; by the Right Hon. Reginald Pole Carew.
- XVI. 264. Description of a Cromlech in Kilkenny; by Joseph Finegan.
- XVI. 348. Description of antiquities discovered on Hagbown Hill; by Ebenezer King.
- XVI. 354. Account of the opening of a Barrow at Stone Heath, near Aylsham, Norfolk; by J. A. Repton.
- XVI. 361. Account of a Stone Celt, found near Stowmarket; of a Brass Spear-head near Gringley, Notts; and of a Tumulus opened at Duntsbourne Abbots Glostershire.
- XVI. 362. Notice of a Tumulus at Avening, Glostershire;

VOL. PAGE.

- of a Celt with ring found at Tadcaster and other Celtic antiquities found in England and Ireland.

Philology and Early English Literature.

A Dictionary of Archaic and Provincial Words, Obsolete Phrases,

Proverbs, and Ancient Customs, from the reign of Edward I. By JAMES ORCHARD HALLIWELL, F.R.S., F.S.A., &c. 2 vols. 8vo, containing upwards of 1000 pages, closely printed in double columns, cloth, 2l. 2s.

This work, which has occupied the Editor some years, is now completed; it contains above 50,000 words (embodying all the known scattered glossaries of the English language) forming a complete key for the reader of the works of our old Poets, Dramatists, Theologians, and other authors whose works abound with allusions, of which explanations are not to be found in ordinary Dictionaries and books of reference. Most of the principal Archaisms are illustrated by examples selected from early inedited MSS. and rare books, and by far the greater portion will be found to be original authorities.

"This promises to be a very useful work, and is evidently the result of extensive research, and of great labour judiciously applied. The want of a work of this description has long been felt, and several attempts have been made to supply the deficiency, but for some reason or other they have all hitherto failed. The Glossary of Archdeacon Nares is not only imperfect, but professedly restricted to a comparatively narrow scope, embracing terms used by the writers chiefly of the Elizabethan era; it is now, besides, a rare and costly book. Boucher's Glossary miscarried because it was begun in an inconvenient form, and on too expensive a scale. The work now before us, of which the first two parts alone have been published, appears to be much more complete than Boucher's, and has the advantage of being printed in a convenient form for reference, while its price is very moderate. It forms a most comprehensive Glossary to all our Old English writers, from the beginning of the fourteenth century to the time of the Stuarts, including the earlier Chroniclers, the writings of Wycliffe, and a long range of Poets, from Piers Ploughman, Chaucer, Gower, Lydgate, &c., to Spenser and his contemporaries, with Shakespeare and the Dramatists of that age. In addition to the obsolete portion of our language, this work may be said to be a complete Dictionary of the local dialects of the present day, and is one which will be an acceptable addition to every library."—*Morning Herald*.

"Mr. Halliwell is, we must acknowledge, as well qualified, by industry, ability, and previous study, to be the editor as any man living. We could indeed easily name a dozen persons, each of whom would be better qualified for particular departments, but not one who, including the whole range embraced by the title would have the ability and energy to go through all the drudging duties of the office more satisfactorily. It is a work, however, that, in the first instance, must be imperfect. We hold, therefore, that every English scholar should have an interleaved copy, that he may contribute a something towards improving a second edition. The first number appears to have been carefully compiled; but we are not inclined to seek very curiously for faults in a work of such obvious difficulty, when, even if it be imperfect, it cannot fail to be useful."—*Athenæum*.

Essays on the Literature, Popular Superstitions, and History of England

in the MIDDLE AGES. By THOMAS WRIGHT, M.A., F.S.A. 2 stout vols. post 8vo, elegantly printed, cloth, 16s.

Contents: Essay I. Anglo-Saxon Poetry. II. Anglo-Norman Poetry. III. Chansons de Geste, or Historical Romances of the Middle Ages. IV. On Proverbs and Popular Sayings. V. On the Anglo-Latin Poets of the Twelfth Century. VI. Abelard and the Scholastic Philosophy. VII. On Dr. Grimm's German Mythology. VIII. On the National Fairy Mythology of England. IX. On the Popular Superstitions of Modern Greece, and their connexion with the English. X. On Friar Rush, and the Frolicsome Elves. XI. On Dunlop's History of Fiction. XII. On the History and Transmission of Popular Stories. XIII. On the Poetry of History. XIV. Adventures of Hereward the Saxon. XV. The Story of Eustace the Monk. XVI. The History of Fulke Fitzwarine. XVII. On the Popular Cycle of Robin-Hood Ballads. XVIII. On the Conquest of Ireland by the Anglo-Normans. XIX. On Old English Political Songs. XX. On the Scottish Poet Dunbar.

Guide to the Anglo-Saxon Tongue: on the basis of Professor Rask's

Grammar, to which are added Reading Lessons in verse and prose, with Notes for the use of learners. By E. J. VERNON, B.A., Oxon. 12mo, cloth, 5s. 6d.

The student is furnished with a cheaper, easier, more comprehensive, and not less trustworthy guide to this tongue, than has hitherto been placed within his reach.

"The author of this Guide seems to have made one step in the right direction, by compiling what may be pronounced the best work on the subject hitherto published in England."—*Athenaeum*.

"Mr. Vernon is a laboriously accurate Anglo-Saxon scholar, as is seen in his attention to the quantity of words; a branch of Anglo-Saxon grammar in which later scholars have done much by comparing the forms of roots as they are found in the different Teutonic dialects."—*Gent.'s Mag. for Feb.*

Reliquiæ Antiquæ. Scraps from Ancient Manuscripts, illustrating chiefly

Early English Literature, and the English Language, edited by WRIGHT and HALLIWELL, 2 vols. 8vo, cloth, 2l. 2s.—REDUCED to 1l. 4s.

Containing communications by Ellis, Madden, Hunter, Bruce, Turnbull, Laing, Nichols, &c. But very few copies remain. Odd numbers may be had to complete sets, at 2s. each.

It contains a large number of pieces in Anglo-Saxon, Anglo-Norman, and Early English; it will be found of use to future Philologists, and to all who take an interest in the history of our language and literature.

Popular Treatises on Science, written during the Middle Ages, in Anglo-

Saxon, Anglo-Norman, and English. 8vo. Edited by THOS. WRIGHT. Cloth, 4s. 6d.

Contents:—An Anglo-Saxon Treatise on Astronomy of the TENTH CENTURY, now first published from a MS. in the British Museum, with a translation; *Livre des Creatures*, by Philippe de Thaun, now first printed with a translation, (extremely valuable to the Philologist, as being the earliest specimens of Anglo-Norman remaining, and explanatory of all the symbolical signs in early sculpture and painting); the *Bestiary* of Philippe de Thaun, with a translation; Fragment on Popular Science from the Early English Metrical Lives of the Saints, (the earliest piece of the kind in the English language.)

An Introduction to Anglo-Saxon Reading; comprising Ælfric's Homily

on the Birthday of St. Gregory, with a copious Glossary, &c. By L. LANGLEY, F.L.S. 12mo, cloth, 2s. 6d.

Anecdota Literaria: A Collection of Short Poems in English, Latin, and French, illustrative of the Literature and History of England in the XIIth Century; and more especially of the Condition and Manners of the different Classes of Society. By T. WRIGHT, M.A., F.S.A., &c. 8vo, cloth. Only 250 printed. 7s. 6d.

Philological Proofs of the original Unity and recent Origin of the Human

Race, derived from a Comparison of the Languages of Asia, Europe, Africa, and America. By A. J. JOHNES. 8vo, cloth. REDUCED from 12s. 6d. to 6s.

Printed at the suggestion of Dr. Pritchard, to whose works it will be found a useful supplement.

Early Mysteries, and other Latin Poems of the XIIth and XIIIth centuries.

Edited from original MSS. in the British Museum, and the Libraries of Oxford, Cambridge, Paris, and Vienna. By THOS. WRIGHT, M.A., F.S.A. 8vo, bds, 4s. 6l.

"Besides the curious specimens of the dramatic style of Middle-Age Latinity, Mr. Wright has given two compositions in the Narrative Elegiac Verse (a favorite measure at that period), in the *Comœdia Babionis* and the *Geta of Vitalis Blesensis*, which form a link of connexion between the Classical and Middle-Age Literature; some remarkable Satirical Rhymes on the people of Norfolk, written by a Monk of Peterborough, and answered in the same style by John of St. Omer; and lastly, some sprightly and often graceful songs, from a MS. in the Arundel Collection, which afford a very favorable idea of the Lyric Poetry of our clerical forefathers."—*Gentleman's Mag.*

The Early History of Free-

masonry in England, Illustrated by an English Poem of the XIVth Century, with Notes. By J. O. HALLIWELL. Post 8vo, SECOND EDITION, with a facsimile of the original MS. in the British Museum, cloth, 2s. 6d.

"The interest which the curious poem of which this publication is chiefly composed has excited, is proved by the fact of its having been translated into German, and of it having reached a second edition, which is not common with such publications. Mr. Halliwell has carefully revised the new edition, and increased its utility by the addition of a complete and correct glossary."—*Literary Gazette*.

Torrent of Portugal; an English

Metrical Romance, now first published, from an unique MS. of the XVth century, preserved in the Chetham Library at Manchester. Edited by J. O. HALLIWELL, &c. Post 8vo, cloth, uniform with *Riton*, Weber, and Ellis's publications, 5s.

"This is a valuable and interesting addition to our list of early English metrical romances, and an indispensable companion to the collections of *Riton*, Weber, and Ellis."—*Literary Gazette*.

"A literary curiosity, and one both welcome and serviceable to the lover of black-letter lore. Though the obsolescence of the style may occasion sad stumbling to a modern reader, yet the class to which it rightly belongs will value it accordingly; both because it is curious in its details, and possesses philological importance. To the general reader it presents one feature of interest, viz the reference to Wayland Smith, whom Sir W. Scott has invested with so much interest."—*Metropolitan Magazine*.

An Essay on the Origin, Pro-

gress, and Decline of Rhyming Latin Verse, with many specimens. By Sir ALEX. CROKE. Post 8vo, cloth, 7s. 6d., reduced to 3s.

"This is a clever and interesting little volume on an attractive subject, the leisure work of a scholar and a man of taste."—*British Critic*.

On the Origin and Formation of

the Romance Languages; containing an examination of M. Raynouard's Theory on the Relation of the Italian, Spanish, Provençal, and French, to the Latin. By GEO. CORNEWALL LEWIS. 8vo, cloth, 12s. REDUCED to 7s. 6d.

The Harrowing of Hell, a Miracle

Play, written in the Reign of Edward II., now first published from the Original in the British Museum, with a Modern Reading, Introduction, and Notes. By JAMES ORCHARD HALLIWELL, Esq., F.R.S., F.S.A., &c. 8vo, sewed, 2s.

This curious piece is supposed to be the earliest specimen of dramatic composition in the English language; *vide* Hailam's Literature of Europe, Vol. I.; Strutt's Manners and Customs, Vol. II.; Warton's English Poetry; Sharon Turner's England; Collier's History of English Dramatic Poetry, Vol. II. p. 213. *All these writers refer to the Manuscript.*

Nugæ Poeticæ; Select Pieces of Old

English Popular Poetry, illustrating the Manners and Arts of the XVth Century. Edited by J. O. HALLIWELL. Post 8vo. Only 160 copies printed, cloth, 5s.

Contents:—Colyn Blowbol's Testament; the Debate of the Carpenter's Tools; the Merchant and his Son; the Maid and the Magpie; Elegy on Lobe, Henry VIIIth's Fool; Romance of Robert of Sicily, and five other curious pieces of the same kind.

Rara Mathematica; or a Collection

of Treatises on the Mathematics and Subjects connected with them, from ancient inedited MSS. By J. O. HALLIWELL. 8vo, Second Edition, cloth, 3s. 6d.

Contents: Johannis de Sacro-Bosco Tractatus de Arte Numerandi; Method used in England in the Fifteenth Century for taking the Altitude of a Steeple; Treatise on the Numeration of Algorithm; Treatise on Glasses for Optical Purposes, by W. Bourne; Johannis Robyns de Cometis Commentaria; Two Tables showing the time of High Water at London Bridge, and the Duration of Moonlight, from a MS. of the Thirteenth Century; on the Mensuration of Heights and Distances; Alexandri de Villa Dei Carmen de Algorismo; Preface to a Calendar or Almanack for 1430; Johannis Norfolk in Artem progressionis summula; Notes on Early Almanacs, by the Editor, &c. &c.

Reliques of Irish Jacobite Poetry,

with Interlinear Translations, and Biographical Sketches of the Authors, and Notes by J. DALY, also English Metrical Versions by E. WALSH. 8vo. Parts I and 2 (all yet published,) 2s.

Popular Errors in English Gram-

mar, particularly in Pronunciation, familiarly pointed out. By GEORGE JACKSON. 12mo, Third Edition, with a coloured frontispiece of the "Sedes Busbeiana." 6d.

Provincial Dialects of England.

Bibliographical List of all the Works

which have been published towards illustrating the Provincial Dialects of England. By JOHN RUSSELL SMITH. Post 8vo, 1s.

"Very serviceable to such as prosecute the study of our provincial dialects, or are collecting works on that curious subject. We very cordially recommend it to notice."—*Metropolitan.*

The Vocabulary of East Anglia,

an attempt to record the vulgar tongue of the twin sister Counties, Norfolk and Suffolk, as it existed in the last twenty years of the Eighteenth Century, and still exists; with proof of its antiquity from Etymology and Authority. By the Rev. R. FORBY. 2 vols. post 8vo, cloth, 12s. (original price 1l. 1s.)

An Historical Sketch of the Pro-

vincial Dialects of England, illustrated by numerous examples. Extracted from the "Dictionary of Archaic and Provincial Words." By JAMES ORCHARD HALLIWELL. 8vo, sewed, 2s.

Westmorland and Cumberland

Dialects. Dialogues, Poems, Songs, and Ballads, by various Writers, in the Westmorland and Cumberland Dialects, now first collected, to which is added, a Copious Glossary of Words peculiar to those Counties. Post 8vo, pp. 408, cloth, 9s.

This collection comprises, in the *Westmorland Dialect*, Mrs. ANN WHEELER'S Four Familiar Dialogues, with Poems, &c.; and in the *Cumberland Dialect*, I. Poems and Pastorals by the Rev. JOSIAH RELPH; II. Pastorals, &c., by EWAN CLARK; III. Letter from Dublin by a young Borrowdale Shepherd, by ISAAC RITSON; IV. Poems by JOHN STAGG; V. Poems by MARK LONSDALE; VI. Ballads and Songs by ROBERT ANDERSON, the Cumbrian Bard (including some now first printed); VII. Songs by Miss BLAMIRE and Miss GILPIN; VIII. Songs by JOHN RAYSON; IX. An Extensive Glossary of Westmorland and Cumberland Words.

"Among the specimens of Cumberland Verse will be found some true poetry, if not the best ever written in the language of rural life this side the Scotch Borders. The writers seem to have caught in their happiest hours inspiration from the rapt soul of Burns. Anderson's touching song of wedded love, 'The Days that are gone,' is a worthy answer for a husband to Burn's 'John Anderson my Jo.'"—*Gent's Magazine.*

"No other two counties in England have so many pieces, both in prose and verse, illustrative of the manners and customs of the inhabitants, and written in their own native dialect. The philologist will find numerous examples of words and phrases which are obsolete in the general language of England, or which have been peculiar to Westmorland and Cumberland from time immemorial. Nor are the pieces uninteresting in other respects. Some of the *patois* verses are rich in the true spirit and vigour of poetry."—*Metropolitan.*

"A charming volume: it contains some beautiful poetical effusions, as well as characteristic sketches in prose."—*Archæologist.*

The Yorkshire Dialect, exemplified

in various Dialogues, Tales, and Songs, applicable to the County, with a Glossary. Post 8vo, 1s.

"A shilling book worth its money; most of the pieces of composition are not only harmless, but good and pretty. The eclogue on the death of 'Awd Daisy,' an outworn horse, is an outpouring of some of the best feelings of the rustic mind; and the addresses to riches and poverty have much of the freedom and spirit of Burns."

Gent's Magazine, May 1841.

Specimens of Cornish Provincial

Dialect, collected and arranged by Uncle Jan Treennoodle, with some Introductory Remarks and a Glossary by an Antiquarian Friend, also a Selection of Songs and other Pieces connected with Cornwall. Post 8vo, with curious portrait of Dolly Pentreath, cloth, 4s.

Exmoor Scolding and Courtship

in the Propriety and Decency of Exmoor (Devonshire) Language, with Notes and a Glossary. Post 8vo, 12th edition, 1s. 6d.

"A very rich bit of West of Englandism."—*Metropolitan.*

The Visitor's Guide to Knole

House, near Seven Oaks in Kent, with Catalogue of the Pictures contained in the Mansion, a Genealogical History of the Sackville Family, &c. &c. By J. H. BRADY, F.R.A.S. 12mo, 27 woodcuts by Bonner, Sly, &c. cloth, 4s. 6d. Large Paper, 10s.

Illustrations of Knole House,

from Drawings by KNIGHT, engraved on wood by Bonner, Sly, &c. 8vo, 16 plates, with descriptions, 5s.

Greenwich; its History, Antiquities,

and Public Buildings. By H. S. RICHARDSON. 12mo, fine woodcuts by Baxter. 1s. 6d.

The Folkestone Fiery Serpent,

together with the Humours of the Dover Mayor; being an Ancient Ballad full of Mystery and pleasant Conceit, now first collected and printed from the various MS. copies in possession of the inhabitants of the South-east Coast of Kent, with Notes. 12mo, 1s.

The History of the Town of

Gravesend in Kent, and of the Port of London. By R. P. CRUDEN, late Mayor of Gravesend. Royal 8vo, 37 fine plates and woodcuts, a very handsome volume, cloth, 1843, REDUCED FROM 11. 8s. to 10s.

Bibliotheca Cantiana, a Bibliogra-

phical Account of what has been published on the History, Topography, Antiquities, Customs, and Family Genealogy of the County of Kent, with Biographical Notes. By JOHN RUSSELL SMITH. In a handsome 8vo volume, pp. 370, with two plates of fac-similes of Autographs of 33 eminent Kentish Writers. 14s. REDUCED TO 5s.—large paper, 10s. 6d.

A Journey to Beresford Hall,

in Derbyshire, the Seat of CHARLES COTTON, Esq. the celebrated Author and Angler. By W. ALEXANDER, F.S.A., F.L.S., late Keeper of the Prints in the British Museum. Crown 4to, printed on tinted paper, with a spirited frontispiece, representing Walton and his adopted Son Cotton in the Fishing-house, and vignette title-page, cloth, 5s.

Dedicated to the Anglers of Great Britain and the various Walton and Cotton Clubs, only 100 printed.

Coins of the Romans relating to Britain, Described and Illustrated. By J. Y.

AKERMAN, F.S.A., Secretary to the Numismatic Society, &c. Second edition, greatly enlarged, 8vo, with plates and woodcuts, cloth, 10s. 6d.

The 'Prix de Numismatique' has just been awarded by the French Institute to the author for this work.

"Mr. Akerman's volume contains a notice of every known variety, with copious illustrations, and is published at very moderate price: it should be consulted, not merely for these particular coins, but also for facts most valuable to all who are interested in the Romano-British history."—*Archæological Journal*.

Ancient Coins of Cities and Princes, Geographically arranged and described,

HISPANIA, GALLIA, BRITANNIA. By J. Y. AKERMAN, F.S.A. 8vo, with engravings of many hundred coins from actual examples, cloth, 18s.

Numismatic Illustrations of the Narrative Portions of the New Testament.

fine paper, numerous woodcuts from the original coins in various public and private collections. 1 vol. 8vo, cloth, 5s. 6d.

Lectures on the Coinage of the

Greeks and Romans, delivered in the University of Oxford. By EDWARD CARDWELL, D.D., Principal of St. Alban's Hall, and Professor of Ancient History. 8vo, cloth, reduced from 8s. 6d. to 4s.

A very interesting historical volume, and written in a pleasing and popular manner.

Essay on the Numismatic History

of the Ancient Kingdom of the East Angles. By D. H. HAIGH. Royal 8vo, 5 plates, containing numerous figures of coins, sewed, 6s.

A Brief Account of the Parish of

Stowting, in Kent, and of the Antiquities lately discovered there. By the Rev. F. WRENCH, Rector. 8vo, three folding plates, etched by the author. 2s. 6d.

History of Portsmouth, Portsea,

Landport, Southsea, and Gosport. By HENRY SLIGHT, Esq. 8vo, Third Edition, bds. 4s.

The Hand-Book to Leicester.

By JAMES THOMPSON. 12mo, SECOND EDITION, enlarged, plates, bds. 2s.

A Hand-Book to Lewes in Sus-

sex, Historical and Descriptive, with Notices of the Recent Discoveries at the Priory. By MARK ANTONY LOWER. 12mo, many engravings, cloth, 2s.

Chronicles of Pevensey in Sussex.

By M. A. LOWER. 12mo, woodcuts, 1s.

Historia Collegii Jesu Cantabri-

giensis à J. SHERMANNO, olim præs. ejusdem Collegii. Edita J. O. HALLIWELL. 8vo, cloth, 2s.

History and Antiquities of the

Hundred of Compton, Berks, with Dissertations on the Roman Station of Calleva Atrebatum, and the Battle of Ashdown. By W. HEWITT, Jun. 8vo, 16 plates, cloth. Only 250 printed. 15s. REDUCED TO 9s.

The Archæologist and Journal of

Antiquarian Science. Edited by J. O. HALLIWELL. 8vo, Nos. 1. to X. COMPLETE, with Index, pp. 490, with 19 engravings, cloth, reduced from 10s. 6d. to 5s. 6d.

Containing original articles on Architecture, Historical Literature, Round Towers of Ireland, Philology, Bibliography, Topography, Proceedings of the various Antiquarian Societies, Retrospective Reviews, and Reviews of Recent Antiquarian Works, &c.

Newcastle Tracts; Reprints of Rare

and curious Tracts, chiefly illustrative of the History of the Northern Counties; beautifully printed in crown 8vo, on a fine thick paper, with fac-simile Titles, and other features characteristic of the originals. Only 100 copies printed. Nos. 1. to XLII, 4l. 2s.

Purchasers are expected to take the succeeding Tracts as published.

Notitia Britanniae, or an Inquiry

concerning the Localities, Habits, Condition, and Progressive Civilization of the Aborigines of Britain; to which is appended a brief Retrospect of the Result of their Intercourse with the Romans. By W. D. SAULL, F.S.A., F.G.S., &c. 8vo, engravings, 3s. 6d.

A Verbatim Report of the Proceed-

ings at a Special General Meeting of the British Archæological Association, held at the Theatre of the Western Literary Institution, 5th March, 1845, T. J. Pettigrew in the Chair. With an Introduction, by THOMAS WRIGHT. 8vo, sewed, 1s. 6d.

A Hand-Book of English Coins

from the Conquest to Victoria. By L. JEWITT.
12mo, 11 plates, cloth, 1s.

at the Canterbury Session, Sept. 1844. By A. J. DUNKIN. Thick 8vo, with many engravings, cloth, 1l. 1s.

"The volume contains most of the papers entire that were read at the Meeting, and revised by the Authors. It will become a scarce book as only 120 were printed; and it forms the first yearly volume of the Archæological Association, or the Archæological Institute."

British Archæological Association.

A Report of the Proceedings and Excursions of the Members of the British Archæological Association,

Popular Poetry, Stories, and Superstitions.**The Nursery Rhymes of England, collected chiefly from Oral Tradition.**

Edited by J. O. HALLIWELL. The Fourth Edition, enlarged, with 33 Designs by W. B. SCOTT, *Director of the School of Design, Newcastle-on-Tyne.* 12mo, in very rich illuminated cloth, gilt leaves, 4s. 6d.

"Illustrations! And here they are; clever pictures, which the three-year olds understand before their A, B, C, and which the fifty-three year olds like almost as well as the threes."—*Literary Gazette.*

"We are persuaded that the very rudest of these jingles, tales, and rhymes, possess a strong imagination-nourishing power; and that in infancy and early childhood a sprinkling of ancient nursery lore is worth whole cartloads of the wise saws and modern instances which are now as duly and carefully concocted by experienced litterateurs, into instructive tales for the *spelling* public, as are works of entertainment for the reading public. The work is worthy of the attention of the popular antiquary."—*Tait's Mag.*

The public are cautioned against other works with imitative titles, which have been published since the second edition of the above, and which are mostly pirated from it. Mr. Halliwell's is the largest collection of these odd ditties ever formed, with explanatory notes, &c. &c.

An Essay on the Archæology of our Popular Phrases and Nursery Rhymes. By

H. B. KER. 2 vols. 12mo, new cloth. 4s. (pub. at 12s.)

A work which has met with great abuse among the reviewers, but those who are fond of philological pursuits will read it now it is to be had at so very moderate a price, and it really contains a good deal of gossiping matter. The author's object is to explain everything from the Dutch, which he believes was the same language as the Anglo-Saxon.

The Merry Tales of the Wise Men of Gotham. Edited by JAMES

ORCHARD HALLIWELL, Esq. F.S.A. Post 8vo, 1s.

These tales are supposed to have been composed in the early part of the sixteenth century, by Dr. Andrew Borde, the well-known progenitor of Merry Andrews. "In the time of Henry the Eighth, and after," says Ant.-à-Wood, "it was accounted a book full of wit and mirth by scholars and gentlemen."

The Noble and Renowned History of Guy, Earl of Warwick, containing

a full and true account of his many famous and valiant actions. 12mo, new edition, with woodcuts, cloth, 2s. 6d.

Saint Patrick's Purgatory; an Essay on the Legends of Purgatory, Hell, and

Paradise, current during the Middle Ages. By THOMAS WRIGHT, M.A., F.S.A., &c. Post 8vo, cloth, 6s.

"It must be observed, that this is not a mere account of St. Patrick's Purgatory, but a complete history of the legends and superstitions relating to the subject, from the earliest times, rescued from old MSS. as well as from old printed books. Moreover, it embraces a singular chapter of literary history, omitted by Warton and all former writers with whom we are acquainted; and we think we may add, that it forms the best introduction to Dante that has yet been published."—*Literary Gazette.*

"This appears to be a curious and even amusing book on the singular subject of Purgatory, in which the idle and fearful dreams of superstition are shown to be first narrated as tales, and then applied as means of deducing the moral character of the age in which they prevailed."—*Spectator.*

Trial of the Witches at Bury St. Edmunds, before Sir M. HALE, 1664, with

an Appendix by CHARLES CLARK, Esq. of Totham, Essex. 8vo, 1s.

"The most perfect narrative of anything of this nature hitherto extant."—*Preface.*

Wonderful Discovery of the Witchcrafts of Margaret and Philip Flower,

daughters of Joan Flower, near Bever (Belvoir), executed at Lincoln for confessing themselves actors in the destruction of Lord Rosse, son of the Earl of Rutland. 1618. 8vo, 1s.

One of the most extraordinary cases of Witchcraft on record.

Account of the Trial, Confession, and Condemnation of Six Witches

at MAIDSTONE, 1652; also the Trial and Execution of Three others at Faversham, 1645. 8vo, 1s.

These transactions are unnoticed by all the Kentish historians.

Biography, Literary History, and Criticism.**England's Worthies, under whom all the Civil and Bloody Warres, since**

Anno 1642 to Anno 1647, are related. By JOHN VICARS, Author of "England's Parliamentary Chronicle," &c. &c. Royal 12mo, reprinted in the old style, (similar to *Lady Willoughby's Diary*), with copies of the 18 rare portraits after Hollar, &c. half morocco, 5s.

Copies of the original edition have been sold from 16l. to 20l.

The portraits comprise, Robert, Earl of Essex; Robert, Earl of Warwick; Lord Montagu, Earl of Denbigh, Earl of Stamford, David Lesley, Gen. Fairfax, Sir Thomas Fairfax, O. Cromwell, Skippon, Col. Massey, Sir W. Brereton, Sir W. Waller, Col. Langhorne, Gen. Poyntz, Sir Thos. Middleton, Gen. Brown, and Gen. Mitton.

Bibliotheca Madrigaliana, a Catalogue of Musical and Poetical Works, published in England in the 16th and 17th Centuries, under the titles of 'Madrigals,' 'Ballets,' 'Ayres,' 'Canzonets,' &c. By E. F. RIMBAULT, LL.D. F.S.A. 8vo, cloth, 7s. 6d.

Autobiography of Joseph Lister, of Bradford, in Yorkshire, to which is added a contemporary account of the Defence of Bradford, and Capture of Leeds by the Parliamentarians in 1642. Edited by THOMAS WRIGHT. 8vo, only 250 copies printed, cloth, 4s.

Love Letters of Mrs. Piozzi, written when she was Eighty, to the handsome Actor, William Augustus Conway, aged Twenty-seven, 8vo, sewed, 2s.

"— written at three, four, and five o'clock (in the morning) by an Octogenary pen, a heart (as Mrs. Lee says) twenty-six years old, and as H. L. P. feels it to be, *all your own*."—*Letter V.* 3d Feb. 1820.

On the Character of Falstaff, as originally exhibited by Shakespeare in the two parts of King Henry IV. By J. O. HALLIWELL. 12mo. cloth, (only 100 printed,) 2s.

Collection of Letters on Scientific Subjects, illustrative of the Progress of Science in England temp. Elizabeth to Charles II. Edited by J. O. HALLIWELL. 8vo, cloth, 3s.

Shakesperiana, a Catalogue of the

Early Editions of Shakespeare's Plays, and of the Commentaries and other Publications illustrative of his Works. By J. O. HALLIWELL. 8vo, cloth, 3s.

"Indispensable to everybody who wishes to carry on any inquiries connected with Shakespeare, or who may have a fancy for Shakespearian Bibliography."—*Spectator*.

A Rot among the Bishops; or a Terrible Tempest in the Sea of Canterbury, set forth in lively emblems to please the Judicious Reader, in Verse. By THOMAS STIRRY, 1641. 18mo, (a satire on Abp. Laud,) four very curious woodcut emblems, cloth, 3s.

A facsimile of the very rare original edition, which sold at Bindley's sale for 13s.

An Introduction to Shakespeare's Midsummer Night's Dream. By J. O. HALLIWELL. 8vo, cloth (only 250 printed), 3s.

An Account of the only known Manuscript of Shakespeare's Plays, comprising some important variations and corrections in the Merry Wives of Windsor, obtained from a Playhouse copy of that Play recently discovered. By J. O. HALLIWELL. 8vo, sewed, 1s.

Miscellanies.

Illustrations of Eating, displaying the Omnivorous Character of Man, and exhibiting the Natives of various Countries at feeding-time. By a BEEF-EATER. Fcap. 8vo, with woodcuts, 2s.

Elements of Naval Architecture, being a Translation of the third part of CLAIRBOIS' "Traité Élémentaire de la Construction des Vaisseaux." By J. N. STRANGE, Commander, R.N., 8vo, with 5 large folding plates, cloth, 5s.

Lectures on Naval Architecture, being the substance of those delivered at the United Service Institution. By E. GARDINER FISHBOURNE, Commander R.N. 8vo, plates, cloth, 5s. 6d.
Both these works are published in illustration of the "WAVE SYSTEM."

Poems, partly of Rural Life (in National English). By WILLIAM BARNES, Author of "Poems in the Dorset Dialect." 12mo, cloth, 5s.

Waifs and Strays (a Collection of Poetry). 12mo. only 250 printed, chiefly for presents, sewed, 1s. 6d.

Books in the Press.

Vestiges of the Antiquities of Derbyshire, and the Sepulchral Usages of its Inhabitants, from the most remote ages to the Reformation. By THOMAS BATEMAN, Esq., F.S.A. 8vo. Profusely Illustrated. Price to Subscribers 11. 1s.

Compendious Anglo-Saxon and English Dictionary. By the Rev. JOSEPH BOSWORTH, D.D., F.R.S., F.S.A., &c.

It will contain all the words of the large octavo edition, with numerous additions, and will be published at a price which will place it within the reach of all who take an interest in the language of their forefathers.

Facts and Speculations on the History of Playing Cards in Europe. By W. A. CHATTO, Author of the 'History of Wood Engravings, with Illustrations by J. Jackson.' 8vo, profusely illustrated with engravings, both plain and coloured.

An Archæological Index, serving as a Guide to the Antiquities of the CELTIC, ROMAN-BRITISH, and ANGLO-SAXON PERIODS. By JOHN YONGE AKERMAN, F.S.A., 8vo, with numerous plates on copper and wood.

J. R. S. will be happy to publish on Commission, any Historical, Antiquarian, or Topographical work; and will give it all possible publicity through the medium of his Catalogues, &c. without cost to the Proprietor.
